Dear Mr. Horwood,

Mature Bay Tree.

Further to your request concerning the increasing size of the bay tree next to your garden gate.

I have made a site visit to view the situation and note that the tree has a spreading growth form which is causing excessive shade to the garden and is beginning to overhang the highway. I suggest that a height reduction of 3m and a reduction in crown spread of 1.5m all round would result in a more compact profile which would be more suitable for the location.

Yours sincerely,

Stuart Power.
