Subject: Network Rail Consultation Response: BN/122/19/EIS

Dear Sir/Madam

Thank you for consulting Network Rail regarding the above Environmental Scoping Opinion, please see below Network Rail's formal comments.

The proposed development has the potential to impact Network Rail's Infrastructure. Network Rail therefore seek the following information either within the EIA or Transport Assessment:

- **Impact on railway stations**

Network Rail ask the applicant provide railway trip generation information for any increase/decrease in rail trips made at Barnham Railway Station as a result of the proposal. The information should contain specifically how many people from the development are expected to use the railway, particularly at peak travel times.

- **Impact on level crossings**

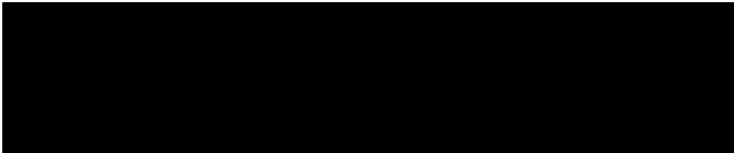

If any level crossing are present in the surrounding area, Network Rail would require information regarding any increase or decrease of both vehicular and non-vehicular usage of the level crossing which may be affected as a result of this proposal, particularly during peak travel times.

The information detailed above will give Network Rail the opportunity to assess and identify any mitigation measures that would need to be included as part of this proposal ensuring the safety of the operational railway.

Kind regards,

Nick Donoghue
