 - 3.3 The District Council covenants to take reasonable steps to procure completion of the Southern POS Transfer Date and/or Green Link Transfer Date (as the case maybe) as soon as reasonably possible after the issue of the Final Completion Notice pursuant to paragraph 1.6 of Schedule 2 and/or paragraph 2.6 of Schedule 2 (as the case maybe).
 - 3.4 The County Council covenants to take reasonable steps to avoid unnecessary delays in the issuing of the Footpath Transfer Notice.

 Reason: For the avoidance of doubt and in the interests of amenity and the environment in accordance with policy D DM1 and D SP1 of the Arun Local Plan.
- 3 No development above damp proof course (DPC) level shall take place unless and until a schedule of materials and finishes and samples of such materials and finishes to be used for external walls (and roofs) of the proposed dwellings have been submitted to and approved by the Local Planning Authority and the materials so approved shall be used in the construction of the building/extension.

Reason: To enable the Local Planning Authority to control the development in detail in the interests of amenity/setting of the Listed Building/ by endeavouring to achieve a building of visual quality in accordance with policies D SP1 and D DM1 of the Arun Local Plan.
- 4 No part of the development shall be first occupied until the road(s), footways, and casual parking areas serving the development have been constructed, surfaced, and drained in accordance with plans and details to be submitted to and approved by the Local Planning Authority.

Reason: To secure satisfactory standards of access for the proposed development in accordance with policies T SP1 and T DM1 of the Arun Local Plan.

REPORT_10150005

thereafter be retained at all times for their designated use.

Reason: In the interests of road safety and in accordance with policies T SP1 and T DM1 of the Arun Local Plan.

- 6 No part of the development shall be first occupied until covered and secure cycle parking spaces have been provided in accordance with plans and details approved by the Local Planning Authority under condition 2 of this permission.

Reason: To provide alternative travel options to the use of the car in accordance with policies T SP1 and T DM1 of the Arun Local Plan.

- 7 Details for the storage of waste on the premises shall be submitted to and approved in writing by the Local Planning Authority prior to the commencement of development. Once approved the waste storage shall be maintained as such at all times thereafter.

Reason: To protect the amenities of nearby residents in accordance with Arun Local Plan policy WM DM1.

- 8 Landscaping (hard and soft) shall be carried out in accordance with the details to be submitted to, and agreed in writing, with the Local Planning Authority, prior to the commencement of development.

All planting, seeding or turfing comprised in the approved details shall be carried out in the first planting and seeding seasons following the occupation of the buildings or the completion of the development, whichever is the sooner, and any trees or plants which within a period of 5 years from the completion of the development die, are removed or become seriously damaged or diseased shall be replaced in the next planting season with others of similar size and species, unless the Local Planning Authority gives written consent to any variation.

Reason: In the interests of amenity and of the environment of the development in accordance with policy D DM1 and ENV DM4 of the Arun Local Plan. This is required to be a pre-commencement condition to ensure the planting can be agreed with the materials palette of the buildings.

- 9 No trees/or bushes/growing/and to be retained/on the site shall be damaged, uprooted, felled, topped or lopped without the prior written consent of the Local Planning Authority until 2 years after completion of the development hereby permitted. Any trees removed without such consent or being severely damaged or becoming seriously diseased or dying before the end of that period shall be replaced with trees of such size and species as may be agreed with the Local Planning Authority.

Reason: To ensure the retention of vegetation important to the visual amenity, /the ecological quality/and for the environment of the development in accordance with policies D DM1 and ENV DM4 of the Arun Local Plan.

- 10 No development shall commence until the applicant has secured the implementation of a programme of archaeological work in accordance with a written scheme of investigation which has been submitted by the applicant and approved by the Local Planning Authority.

Reason: The site is of archaeological significance in accordance with Arun Local Plan Policy HER DM6. This is required to be a pre-commencement condition to ensure no irreversible harm to any archaeological significance is incurred throughout the undertaking of this development.

- 11 Prior to the commencement of construction works details of a proposed foul drainage system

BN/135/20/PL

shall be submitted to and approved in writing by the Local Planning Authority (including details of its siting, design and subsequent management / maintenance) and no dwelling shall be occupied until works for the disposal of sewage have been fully implemented in accordance with the approved details.

Reason: To ensure that the proposed development has a satisfactory means of disposing of foul sewerage in accordance with policies W DM1 and W DM3 of the Arun Local Plan.

- 12 Development shall not commence, other than works of site survey and investigation, until full details of the proposed surface water drainage scheme have been submitted to and approved in writing by the Local Planning Authority.

The design should follow the hierarchy of preference for different types of surface water drainage disposal systems as set out in Approved Document H of the Building Regulations, and the recommendations of the SuDS Manual produced by CIRIA. Winter groundwater monitoring to establish highest annual ground water levels and winter Percolation testing to BRE 365, or similar approved, will be required to support the design of any Infiltration drainage. No building / No part of the extended building shall be occupied until the complete surface water drainage system serving the property has been implemented in accordance with the agreed details and the details so agreed shall be maintained in good working order in perpetuity.

Reason: To ensure that the proposed development is satisfactorily drained in accordance with policies W SP1, W DM1, W DM2 and W DM3 of the Arun Local Plan. This is required to be a pre-commencement condition because it is necessary to implement the surface water drainage system prior to commencing any building works.

- 13 Development shall not commence until full details of the maintenance and management of the surface water drainage system is set out in a site-specific maintenance manual and submitted to, and approved in writing, by the Local Planning Authority. The manual is to include details of financial management and arrangements for the replacement of major components at the end of the manufacturer's recommended design life. Upon completed construction of the surface water drainage system, the owner or management company shall strictly adhere to and implement the recommendations contained within the manual.

Reason: To ensure that the proposed development is satisfactorily drained in accordance with policies W DM1, W DM2 and W DM3 of the Arun Local Plan. It is considered necessary for this to be a pre-commencement condition to ensure that the future maintenance and funding arrangements for the surface water disposal scheme are agreed before construction commences.

- 14 Immediately following implementation of the approved surface water drainage system and prior to occupation of any part of the development, the development/applicant shall provide the local planning authority with as-built drawings of the implemented scheme together with a completion report prepared by an independent engineer that confirms that the scheme was built in accordance with the approved drawing/s and is fit for purpose. The scheme shall thereafter be maintained in perpetuity.

Reason: To ensure that the proposed development is satisfactorily drained in accordance with policies W SP1, W DM1, W DM2 and W DM3 of the Arun Local Plan.

- 15 Notwithstanding the provisions of Part 1 of Schedule 2 of the Town and Country Planning (General Permitted Development) (England) Order, 2015 (or any Order revoking or re-enacting this Order) no extensions (including porches or dormer windows) to the dwelling houses shall be constructed or buildings shall be erected within the curtilage unless

REPORT_13116056

BN/135/20/PL

permission is granted by the Local Planning Authority on an application in that behalf.

Reason: To safeguard the privacy and amenity of adjoining occupiers, maintain adequate amenity space and safeguard the cohesive appearance of the development in accordance with policy D DM1 of the Arun District Local Plan.

- 16 Notwithstanding the provisions of the Town and Country Planning (General Permitted Development) (England) Order 2015, (or any order revoking or re-enacting that Order) the building shall not be extended or altered in any way unless permission is granted by the Local Planning Authority on an application in that behalf.

Reason: (a) To enable the Local Planning Authority to control the development in detail in the interests of the amenities of adjoining residential occupiers and the locality in general in accordance with policy GEN7 of the Arun District Local Plan.

- 17 Prior to the commencement of development, details of Green Link including specification of paving material, planting schedule and maintenance and management plan shall be submitted to, and agreed in writing, with the Local Planning Authority. Once agreed the Green Link shall be provided prior to the first occupation of the residential units hereby permitted and maintained as such at all times thereafter.

Reason: In the interests of design and connectivity in accordance with Policies T SP1, T DM1, D SP2 and D DM1 of the Arun Local Plan.

- 18 Construction work shall not commence unless and until an impact assessment of the noise from the development on occupants of existing nearby residential properties and future occupants of the new residential properties has been completed and submitted in writing to the Local Planning Authority. The impact assessment shall include noise from deliveries and operation of the development and shall include a noise mitigation scheme. The assessment shall have regard to the principles of BS 4142:2014 and achieve a difference between the measured 'rating' level and the measured 'background' level of at least BdB(A). A test to demonstrate compliance with the noise mitigation scheme shall then be undertaken by a competent acoustician/consultant before the use commences.

Reason: To protect the amenity of local residents in accordance with Policies QE SP1 and QE DM1 of the Arun Local Plan. This planning condition is required to be pre-commencement to ensure an assessment of noise impacts from development and measures to mitigate impacts are secured prior to works commencing.

- 19 No construction/demolition activities shall take place, other than between 0800 to 1800 hours (Monday to Friday) and 0800 to 1300 hours (Saturday) with no activities on Sunday or Bank Holidays.

In addition to these hours of working the Local Planning Authority may approve in writing a schedule of activities where it is necessary to conduct works outside the hours specific in this condition.

Reason: To protect the amenity of local residents in accordance with Policies QE SP1 and QE DM1 of the Arun Local Plan.

- 20 Prior to commencement of the development hereby approved (or such other date or stage in the development as may be agreed in writing with the Local Planning Authority), the following components of a scheme to deal with the risks associated with contamination of the site shall each be submitted to and approved in writing by the Local Planning Authority:

BN/135/20/PL

1. A 'Preliminary Risk Assessment' which has identified: all previous (historical) uses; potential contaminants associated with those uses; a conceptual model of the site indicating sources, pathways and receptors; and potentially unacceptable risks arising from contamination at the site.

2. A 'Site Investigation Scheme', based on (1) above to provide information for a detailed assessment of the risk to all receptors that may be affected, including those off site.

3. Based on the 'Site Investigation Scheme' and the detailed risk assessment (2), an options appraisal and remediation strategy giving full details of the remediation measures required and how they are to be undertaken.

4. A 'Verification Report' providing details of the data that will be collected in order to demonstrate that the works set out in (3) are complete and identifying any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.

Note: Any changes to these components, (1) to (4) require the express written consent of the Local Planning Authority.

The scheme shall be implemented as approved and, prior to commencement of any construction work (or such other date or stage in development as may be agreed in writing with the Local Planning Authority), a Verification Report demonstrating completion of the works set out in the approved remediation strategy and the effectiveness of that remediation shall be submitted to and approved in writing by the Local Planning Authority. The report shall include results of sampling and monitoring carried out in accordance with the approved verification plan to demonstrate that the site remediation criteria have been met. The report shall also include a 'long-term monitoring and maintenance plan' for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action, as identified in the verification report, and for the reporting of this in writing to the Local Planning Authority.

Reason: To protect the amenity of local residents in accordance with Policy QE DM4 of the Arun Local Plan. This condition is required to be pre-commencement to ensure any contamination on site is appropriately remedied prior to works commencing.

21 No development shall commence until a Construction Management Plan has been submitted to and approved in writing by the Local Planning Authority. Thereafter the approved Plan shall be implemented and adhered to throughout the entire construction period. The Plan shall provide details as appropriate but not necessarily be restricted to the following matters,

- the anticipated number, frequency and types of vehicles used during construction,
- the method of access and routing of vehicles during construction,
- the parking of vehicles by site operatives and visitors,
- the loading and unloading of plant, materials and waste,
- the storage of plant and materials used in construction of the development,
- the erection and maintenance of security hoarding,
- the provision of wheel washing facilities and other works required to mitigate the impact of construction upon the public highway (including the provision of temporary Traffic Regulation Orders),
- details of public engagement both prior to and during construction works.

Reason: In the interests of highway safety and the amenities of the area in accordance with

REPORT 10-10-2020

policy TSP1 of the Arun Local Plan.

- 22 Prior to the installation and use of lighting, details of the external lighting of the site shall be submitted to and approved in writing by the Local Planning Authority. These details shall include the predictions of both horizontal illuminance across the site and vertical illuminance affecting immediately adjacent receptors. The lighting installation shall comply with the recommendations of the Institution of Lighting Professionals (ILP) "Guidance Notes for the Reduction of Obtrusive Light" (GN01:2011). The lighting scheme for the site will need to take into consideration the presence of bats in the local area and the scheme should minimise potential impacts to any bats using the trees, hedgerows and buildings by avoiding unnecessary artificial light spill through the use of directional light sources and shielding.

Prior to installation of the lighting scheme the predicted illuminance levels shall be tested by a competent person to ensure that the illuminance levels agreed in the scheme are achieved. Should these levels be unable to be met, a report shall demonstrate what measures have been taken to reduce the levels to those agreed within the application scheme.

The approved installation shall be maintained and operated in accordance with the approved details unless the Local Planning Authority gives its written consent to a variation.

Reason: To protect the amenity of local residents and protected species in accordance with Policies QE SP1, QE DM2 and ENV DM5 of the Arun Local Plan.

- 23 No part of the development shall be first occupied until a Travel Plan has been submitted to and approved in writing by the Local Planning Authority. The Travel Plan once approved shall thereafter be implemented as specified within the approved document. The Travel Plan shall be completed in accordance with the latest guidance and good practice documentation as published by the Department for Transport or as advised by the Highway Authority.

Reason: To encourage and promote sustainable transport and in accordance with policies T SP1 and T DM1 of the Arun Local Plan.

- 24 Upon the first occupation, the Applicant shall implement the measures incorporated within the approved travel plan. The Applicant shall thereafter monitor, report and subsequently revise the travel plan as specified within the approved document.

Reason: To encourage and promote sustainable transport in accordance with policy T SP1 and T DM1 of the Arun Local Plan.

- 25 The development shall be undertaken in accordance with the mitigation measures set out in the Lizard Landscape Design and Ecology Preliminary Ecological Appraisal Survey and Preliminary Protected Species and Bat Roost Assessment Survey dated 28 March 2018 and maintained in perpetuity, where required, at all times thereafter.

Reason: To protect local wildlife and protected species, in accordance with the relevant legislation and policy ENV DM5 of the Arun Local Plan.

- 26 Any works to the trees or vegetation clearance on the site shall be undertaken outside of the bird breeding season which takes place between 1st March - 1st October. If works are required within this time a suitably qualified ecologist shall survey the site for the presence of birds prior to any works taking place (within 24 hours of any work).

Reason: To protect local wildlife and protected species, in accordance with the relevant legislation and policy ENV DM5 of the Arun Local Plan.

- 27 Prior to the commencement of development an annotated site plan (showing siting, scale and

REPORT 101 10/20/20

BN/135/20/PL

nature of proposed biodiversity enhancement measures) shall be submitted to and approved in writing by the Local Planning Authority.

The development shall thereafter be carried out in accordance with these approved details and the biodiversity enhancements set out in the agreed details.

Reason: To ensure the proposals would result in a Net Biodiversity Gain, in accordance with the Environmental Bill and policy ENV DM5 of the Arun Local Plan.

- 28 At least 10% of the energy supply of the development shall be secured from decentralised and renewable or low carbon energy sources (as described in the glossary at Annex 2 of the National Planning Policy Framework) unless it can be demonstrated that a fabric-first approach would achieve an equivalent saving.

Details and a timetable of how this is to be achieved for each phase or sub phase of development, including details of physical works on site, shall be submitted to and approved in writing by the Local Planning Authority prior to the commencement of development. The development shall be implemented in accordance with the approved details and timetable and retained as operational thereafter.

Reason: In order to secure a reduction in the use of energy at the site in accordance with national planning policy and policy ECC SP2 of the Arun Local Plan. This is required to be a pre-commencement condition because the approved measures may need to be built into the fabric of the buildings.

- 29 Prior to the occupation of any part of the development, a strategy for the provision of the highest available headline speed of broadband provision to future occupants of the site shall be submitted to and approved in writing by the Local Planning Authority. The strategy shall be submitted to and approved in writing by the Local Planning Authority. The strategy shall take into account the timetable for the delivery of 'superfast broadband' (defined as having a headline access speed of 24Mb or more) in the vicinity of the site (to the extent that such information is available). The strategy shall seek to ensure that upon occupation of a dwelling, the provision of the highest available headline speed of broadband service to that dwelling from a site-wider network is in place and provided as part of the initial highway works and in the construction of frontage thresholds to dwellings that abut the highway. Unless evidence is put forward and agreed in writing by the Local Planning Authority that technological advances for the provision of a broadband service for the majority of potential customers will no longer necessitate below ground infrastructure, the development of the site will continue in accordance with the approved strategy.

Reason: To safeguard the amenities of future residents in accordance with Arun Local Plan policy TEL SP1.

- 30 Prior to commencement of development the applicant shall prepare and submit for approval an Employment and Skills Plan. Following approval of the Employment and Skills Plan the development will implement and promote the objectives of the approved plan.

Reason: In accordance with Policy SKILLS SP1 of the Arun Local Plan. It is considered necessary for this to be a pre-commencement condition as it relates to the construction phase of development and to ensure measures are in place so that local crafts people and apprentices are employed on the development.

- 31 Prior to the commencement of development the applicant shall prepare and submit a Accessible Dwellings Plan detailing which dwellings on the site shall be provided to M4(2) and M4(3) standards. Following agreement in writing with the Local Planning Authority, the

REPORT 10/11/2020

BN/135/20/PL

identified dwellings agreed shall be provided and retained as such at all times thereafter in perpetuity.

Reason: To promote a housing mix that accords with the demographic requirements of the District, as indicated in the Council's Strategic Housing Market Assessment and indicate within the Arun Local Plan and Arun District Council Design Guide SPD.

32 INFORMATIVE: This permission conveys consent under planning legislation only and contravention with other legislation e.g. protection of wildlife etc. should be considered.

33 INFORMATIVE: Statement pursuant to Article 35 of the Town and Country Planning (Development Management Procedure)(England) Order 2015. The Local Planning Authority has acted positively and proactively in determining this application by identifying matters of concern within the application (as originally submitted) and negotiating, with the Applicant, acceptable amendments to the proposal to address those concerns. As a result, the Local Planning Authority has been able to grant planning permission for an acceptable proposal, in accordance with the presumption in favour of sustainable development, as set out within the National Planning Policy Framework.

34 INFORMATIVE: This decision has been granted in conjunction with a Section 106 legal agreement relating to

Assessment of Additional Needs

Additional needs for services are assessed by calculating the additional population likely to come from a proposed development.

The figures in the table below show the **occupancy rates** from Census 2011 (number of people) per dwelling type and size for open market and social housing. These rates are used to calculate the additional population likely to come from a proposed development. For an outline planning application, where the housing mix is not yet determined, the average occupancy rate is 2.5 persons per dwelling.

Dwelling Size	Occupancy Rate (House)	Occupancy Rate (Flat)
1 bed	1.5 persons	1.3 persons
2 bed	1.9 persons	1.9 persons
3 bed	2.5 persons	2.4 persons
4+ bed	3.0 persons	2.8 persons

Exclusions and reductions are as follows.

- Demolished or converted dwellings, excluding those that have been vacant for five or more years, are subtracted from the gross gain. The population from such dwellings will be deducted according to the type of accommodation and relevant occupancy rate, so we are looking for the *net* increase in residents.
- Demolition of existing bedsit accommodation (with an assumed occupancy of one person) is excluded for all services except those for children and young people as it is unlikely that bedsits will accommodate children.
- In Horsham and Mid Sussex districts, a 33% reduction of the additional population from all social housing units is granted due to the number of concealed households moving into the development. Concealed households are households currently living with friends and relatives because they are unable to gain access to the housing market.
- In the districts and boroughs of Adur, Arun, Chichester, Crawley, and Worthing, no contributions are required for social-rented housing but contributions for other types of affordable housing may be required, including help-to-buy schemes.
- Contributions are not sought from developments of sheltered housing for the very frail elderly or care homes.

Adults' Services

We provide a range of services to support older people and people with a disability or mental health need. These services include day centres, care homes, housing schemes, and shared use of community facilities. As new development may increase demand and pressure on existing facilities, we may request contributions for either new infrastructure or extensions to those facilities.

Education and Schools

We have a statutory responsibility to provide education for all children of school age, normally ages four to 16, and to ensure sufficient nursery education for three- and four-year-olds in partnership with other sectors.

Our policies for admission of pupils to schools aim to ensure that parents can normally expect places for their children at the schools serving the area in which they live.

The housing and population characteristics of the wider area will provide a guide in the assessment of the likely age profiles and additional children arising from the proposed development. The average standards are set out in the table below.

School Type	Child Product
Primary (ages 4 to 11)	25 per 100 dwellings
Secondary (ages 11 to 16)	18 per 100 dwellings
Secondary (ages 16 to 18)	4 per 100 dwellings

Note that for children aged 16-18, the child product is 7 pupils per 100 dwellings, assuming a 100% cohort survival rate. In West Sussex, however, the average rate for pupils progressing from Year 11 to Year 12 and 13 is 54%. This, in effect, means a reduction from 7 pupils per 100 dwellings jointly for the two-year groups to 4 pupils per 100 dwellings.

We have adopted the Department for Education's average build cost multipliers with regional adjustment factors. Where the cost multiplier has not been updated for the new financial year, the most recent cost multiplier will be used and updated according to the relevant change in the Royal Institution of Chartered Surveyors' Building Cost Information Service's All-In Tender Price Index.

These cost multipliers are building costs per pupil place, derived from data collected by the Department for Education (formerly the Department for Children, Schools and Families) on the actual costs of enlarging existing schools and building new schools. The cost multipliers include fixed equipment costs and fees but exclude the costs of providing loose equipment.

The WSCC calculator is used for smaller developments where contributions are sought for the improvement and expansion of **existing** schools. Strategic developments with pupil numbers greater than the local schools have capacity to take or expand to, are subject to bespoke requirements.

'Early Years' provision should be included alongside new primary school sites.

Calculating Contributions

Financial contributions for school infrastructure are broken up into three categories: primary, secondary, and sixth form. Depending on the existing local infrastructure, only some or none of these categories of education will be required.

Where the contributions are required, the calculations are based on the additional amount of children, and thus school places, that the development would generate, referred to as TPR (**total places required**). The TPR is then multiplied by the

Department for Education's school building costs per pupil place, known as the cost multiplier.

- Education Contributions = TPR x cost multiplier

The TPR is determined by the number of year groups in each school category multiplied by the **Average Child Product** (ACP).

- TPR = Number of year groups x ACP

Year groups are set out in the table below.

School Type	Number of Year Groups
Primary	7 year groups (ages 4 to 11)
Secondary	5 year groups (ages 11 to 16)
Sixth Form places	2 year groups (ages 16 to 18)

Average Child Product is the adjusted education population multiplied by the average amount of children, taken to be 14 children per year of age per 1,000 persons for houses and bungalows (average figure taken from 2001 Census). For flats and maisonettes, the average number is five children per year per 1,000 persons.

- Child Product = Adjusted Population x 14/1,000 (or 5/1,000 for flats)

The adjusted education population for the child product excludes population generated from one-bed units, sheltered, and 55+ age-restricted housing, and social-rented housing on a district by district basis according to supplementary planning guidance, as a nil child product is assumed for these dwellings.

The **cost multiplier** is a figure released by the Department for Education. It is a school building cost per pupil place as at 2019/2020, updated by Royal Institute of Chartered Surveyors' Building Cost Information Service's All-In Tender Price Index.

The cost multipliers are set out in the table below.

School Type	Cost Multiplier
Primary	£18,370 per child
Secondary	£27,679 per child
Sixth Form places	£30,019 per child

To find out whether education contributions are required, check the locality table and education maps on our website: www.westsussex.gov.uk/s106.

Other Services for Children and Young People

Contributions will be sought where necessary towards youth provision and other facilities such as residential care. Though required for large strategic developments, each development will be considered on a case-by-case basis.

Libraries

As recommended by the International Federation of Library Associations and Institutions, we have adopted standards that relate service provision to population numbers.

The applied average standard is 32m² per 1,000 population, varying from 30m² to 35m². Where a library is unable to meet these standards due to development, a reasonable contribution will be requested towards the service based on the adopted floorspace standards, the library building cost per square metre and the additional population coming from the proposed development.

For catchment populations up to 4,000, service provision will be by means of mobile libraries. For populations of over 4,000, the service will be delivered through built libraries. The type of library will be determined by the size of the catchment population.

Where the best means for the delivery of library services to a new development is a mobile library, you will be required to provide a suitable parking area (with good links to the local transportation network and access to a power supply) and/or a proportionate financial contribution towards the costs of providing and stocking an extra vehicle.

Where the appropriate means for the delivery of library services to a new development is a built library, you will be required to make fair and proportionate contributions towards the costs of providing and stocking a new or improved permanent building, including any necessary land acquisition. Where the existing capacity of a library would not be able to serve new development, the contribution will be calculated as follows:

- Additional Population x Cost per Head of Improvements to Library Services

The needs of the library service will have to be assessed individually and in context. Occasionally, more than one feasible way of meeting those needs within our standards will be identified. For example, improvement of the mobile library service in combination with an enhancement of facilities at the major library in the nearest town could be an acceptable alternative to development of a neighbourhood library, on site or nearby, for about the same overall cost. Therefore, where the library needs of a particular development proposal may be satisfied equally well by one or more alternatives, you will be required to contribute towards the most appropriate solution identified by us.

Calculating Contributions

Two methodologies are used for calculating library infrastructure contributions. These have been locally tailored on the basis of required contributions and the nature of the library in the locality.

Library infrastructure contributions are determined by the population adjustment resulting in a square-metre demand for library services.

The square-metre (SQM) demand is multiplied by a cost multiplier which determines the total contributions:

- Contributions = extra library space required x Cost Multiplier

The **extra library space** is the space in square metres per 1,000 population.

The **square-metre demand** for library floorspace varies across the relevant districts and parishes based on available library infrastructure and the settlement population in each particular locality.

The **local floorspace demand** (LFD) figure varies between 30 and 35 square metres per 1,000 people and is provided with each individual calculation.

- Square Metre Demand = (Adjusted Population x LFD) / 1,000

The **adjusted population** is the sum of the occupancy for the net dwelling increase with the exclusion of social housing increase.

The **cost multiplier** for providing relatively small additions to the floorspace of existing library buildings is currently £5,252 per square metre. This estimated figure was updated by our quantity surveyor for 2018/2019.

Fire and Rescue Services

Fire Hydrants

Works may be needed to fulfil our duty to ensure the provision of an adequate supply of water for fire fighting. Requirements for the provision of fire hydrants affixed to water mains and the carrying out of other works that are necessary to ensure adequate

supplies of water, in terms of both volume and pressure, may be sought either as planning conditions or possibly through a legal agreement.

Adequate access for fire-fighting vehicles and equipment from the public highway must be available and may require additional works on or off site, to comply with Building Regulation BS5588 Part 5 – 2004.

The locations and spacing of hydrants should conform to guidance given by the Fire and Rescue Service and, where possible, such locations will be at main roads, feeder roads or road junctions where they are readily visible.

Full details of the Fire and Rescue Service standards for access roads (including weight requirements) and for water supplies are available on request.

The installation costs of fire hydrants will also be required on developments as a direct cost to the developer, as required under the Fire Services Act 2004.

Infrastructure

In addition to fire hydrants, you may be required to contribute towards the provision of new fire-fighting services or facilities so that we can meet our statutory requirements and prescribed standards of fire cover for the area, as set out in the Fire and Rescue Services Act 2004. The costs will be based on the additional population coming from the proposed development, the cost per square metre of building fire stations, and the infrastructure improvements necessary to serve the proposed development.

Contributions will be used to finance new fire-fighting equipment and services, extensions to fire stations or the provision of new facilities or other fire and rescue infrastructure as necessary, such as fire prevention equipment. Contributions will be based on:

- Additional population x cost per head of fire and rescue infrastructure improvements

Only in relation to largest-scale new developments, such as possibly a new settlement, might contributions be required to cover the full cost of providing an entirely new fire station which is not replacing an existing service. In such cases, it would be expected that land would be provided free of charge.

Calculating Contributions

The contribution for Fire and Rescue Services infrastructure is determined by the population adjustment multiplied by the relevant cost multiplier for the provision of services.

- Fire and Rescue Contributions = Adjusted Population x Cost Multiplier

The **adjusted population** is the sum of the occupancy rates for the net dwelling increase with the exclusion of social housing increase.

The **cost multiplier** is calculated by dividing the total cost of necessary fire and rescue infrastructure within the relevant division by the projected population for 2016. The cost multipliers are set out in the table below.

Division	Cost Multiplier
Southern (Adur, Arun, Chichester, Worthing)	£15 per person
Northern (Crawley)	£105 per person
Northern (Horsham, Mid Sussex)	£57 per person

Waste Management

Contributions for waste management services, such as recycling facilities and waste sites, have not been required since 2011/12. This situation is monitored and improvements may be considered for the future.

Total Access Demand (TAD)

The methodology is based on total access to and from a development.

An infrastructure contribution is required for each occupant or employee provided with a parking space, as they would be more likely to use the road infrastructure.

A sustainable transport contribution is required for each occupant or employee not provided with a parking space as they would be likely to rely on sustainable transport.

- * $TAD = \text{Infrastructure contribution} + \text{Sustainable Transport contribution}$

The **infrastructure contribution** is determined by the net increase in car parking spaces, multiplied by our estimated cost of providing transport infrastructure per vehicle. The 2019/2020 cost multiplier is £1,407 per parking space.

- * $\text{Infrastructure contributions} = \text{Car parking spaces} \times \text{Cost multiplier}$

The **sustainable transport contribution** is derived from the net car parking increase subtracted from the projected increase in occupancy of the development. The sustainable transport contribution increases where the population is greater than the parking provided. The sustainable transport figure is then multiplied by our estimated costs of providing sustainable transport infrastructure cost multiplier (£703 for 2019/2020).

- * $\text{Sustainable transport contributions} = (\text{net car parking} - \text{occupancy}) \times 703$

Occupancy is determined by projected rates per dwelling and projected people per commercial floorspace as determined by us.
