Dear Mr Crowder

Thankyou for our recent telephone conversation. I have put it in writing so that you recall when looking at the plans the distance between my side of my property and the bungalow to be built. There is a distance of 1.5 metres from the side of the house to the fence. You said originally there were 6 metres however I have looked and cannot see how they came up with this measurement. Unless they are to build $4\frac{1}{2}$ metres away from my house the other side of the fence. Please could you see there is as much distance as possible given between myself and the house next door. Also that it is kept to a bungalow and not a house, I wish to keep

light and privacy, I may sound
demanding but this project will have the
biggest impact on my
house as you will see
from your plans.

Yours

Faithfully
