Subject: Weekend Sewage Issues - Land South of Barnham Station

Dear Mr Cole,

I thought it pertinent to advise you of the problems Barnham experienced with sewage this past weekend.

A contractor for Southern Water visited the pumping station in Marshall Close, I took the opportunity to speak with him. He explained that Barnham due to the rain was experiencing backed up sewage in several areas and had located the problem to Marshall Close. He said the drains simply cannot cope with the surface water due to the rain, which then feeds into the sewage capacity. The station was furiously pumping filtered sewage into the Rife, right next to where the proposed development will be situated, the smell not being pleasant as you can imagine. We had to endure a weekend of not being able to flush our toilet, yet again.

The contractor has worked in the area for many years and described that these issues are increasing all the time. Our climate is wetter than ever and the assessments taken place have not taken this into consideration. Further downstream at the weekend the Rife had flooded, rendering the footpaths and fields to that of a lake.

I am sorry to be emailing you again regarding this situation, however by living here we are able to feed back the situation in reality, rather than through assessments that do not tell the real story.

Kind Regards,

Sydnee Kalinski
