FAO Mrs D Johnson

Dear Mrs Johnson,

Ref: Homeville Planning Application - BN/18/15/HH

Development: Single storey rear extension & change in rear fenestration.

Location: Homeville - Lake Lane Barnham

Thank you for your letter of 20th May 2015. We would comment on the issues you have raised as follows:

1. Block Plan –

- a) We have attached a Block plan drawing A2142PA2000 at a scale of 1:200 which will enable you to read the dimension
- b) We have indicated the dimension from the rear of the proposal to the rear site boundary.

2. Elevations and Plan –

- a) The existing and proposed East Elevations have been updated to accord with the Ground Floor Plan. Please see the attached documents A2142EX3000_REVA, A2142PA3001_REVA, A2142PA2001_REVA

3. Lidsey Foul Water Environmental Assessment –

- a) We are relocating a toilet on the Ground Floor and will be connecting to an existing manhole. There are no alterations envisaged to the existing entry into the public sewer system.

We trust the above information and documents clarifies the position and will enable you to accept the application as valid. Thank you.

Yours sincerely,

Peter Cook
