

Hi there

Pls could you add the below comments to the case file online and label as 'Tree Officer comments 2'

Thanks
Amy

Dear Amy

In response to further information provided by the Agent (email including the latest revision (03) of their drawing no. DPA-01, Pope Stevens Architecture Ltd.) I conclude as follows:

1. The Construction Management Plan describes the heavy plant to be used to deliver materials, single access route in/out of site and compound area for storage of materials. I am satisfied with this plan which should be included in a condition forming part of any APPROVAL.
2. Clarity has been provided around the extent of the native tree/hedgerow planting scheme. Although not as ambitious as first proposed, it nonetheless has the potential to adequately compensate for the removal of those trees around the polytunnels, if adequate aftercare is applied.

Note to Agent: Irrespective of their origin and quality rating (BS5837:2012 – Trees in relation to design, demolition and construction) all established trees are a material consideration in the planning process.

I raise no objection to the proposal on arboricultural grounds.

I do not wish to apply any specific tree-related conditions.

Regards,

Mark
