Further to our discussion today, I confirm that a full set of architectural drawings will not be necessary to support an application for listed building consent, due to the specific nature of the works involved. The detail drawings viewed during today's meeting, together with a vertical section drawing through the mill identifying the location of the new platform, will be sufficient to allow a clear understanding of the proposed works in this particular case.

Angela,

Is it possible to make an appointment for 2pm on Wednesday 24th May?

Thanks

Stewart

There really is no further guidance to offer, but you are welcome to come into Arun DC's office to discuss it if you wish. I work Wednesdays and Thursdays and an appointment could be made anytime between 10am and 3pm.

Hello Angela,

As you may be aware and upon recommendation from your office, we shared the proposal with Ian Wightman prior to any submission. His response is further down in the e-mail trail.
