NOTES:

Drainage:
All drainage invert information has been obtained through visual inspection only, with no entry into manholes. Therefore the complete accuracy cannot be guaranteed. Where drainage is of critical importance we suggest the services of a specialist drainage expert be used.

Trees:
Every effort has been made to identify and detail all trees on site but where trees are of critical importance we suggest the use of a specialist such as an arborist. Tree spread and heights are indicative.

Revision:
Rev 290315-S59 - This survey is as per the previous Rev 150415 drawing with the addition of levels and building positions within the eastern side of the neighbouring property Laurdi.
