re: Planning Application BN/29/15/PL – Solar Park Development at Barnham Court Farm

fao Richard Temple

As a long term resident of Church Lane Barnham I am worried about the possible use of Church Lane as access for the construction of a proposed Solar Park at Barnham Court Farm.

Church Lane is, as the name implies, a lane. It has no pavements and as such requires pedestrians, cyclists, and motor vehicles all to use this narrow lane.

The pedestrian and cyclist traffic has increased a great deal recently, due to the introduction of the Cycle Path from Bognor Regis and the entrance to the new facilities in the field behind Barnham Village Hall.

The vehicle traffic has also increased including cars that are parked, during the whole day, at the northern end of the lane making entering and leaving the lane extremely difficult at this point.

I hope these comments will be of help when you come to make a decision about the above application.
