Re Planning Application BN/29/15/PL

Dear Mr Temple

We are writing to express our objection to the proposed transport plan for the delivery of solar panels to site for the above referenced solar farm. While having no objections in principle to a solar farm, we do question the need for one so close to the existing solar farm in the fields adjoining Hoe Lane.

Our objection to the transport plan is the use of Church Lane, a narrow country lane, as a staging post for the transfer of the panels from large heavy goods vehicles to smaller vehicles for transporting the panels onto site.

The proposed location for the transfer is halfway down Church Lane, with nowhere for the lorries to turn, so not only will they block Church Lane when they transfer the panels, they will still have to travel the length of Church Lane to find somewhere to turn causing major disruption to the many residents of the Lane.

Yours sincerely

Roger and Patricia Palmer
Street Cottage, Church Lane
