Subject: Planning Application BN/29/15/PL

Dear Richard, I have just filed a comment on the planning website, but the comment space is limited and I wish to stress my concerns about the health and safety aspects in relation to the proposed construction traffic and other users of Church Lane. Church Lane is frequently used by pedestrians (including children and push chairs on their way to Murrrells Field community park), vulnerable older people (including those in wheelchairs/disability scooters), dog walkers, cyclists (using the Barnham to Felpham cycle way), horse-riders and hikers. Of particular concern is the issue of access to St Mary's Church, on the blind bend at the top of the cycle path, which has weekday services in addition to Sundays (including a Roman Catholic service on a Monday morning).

Kind regards

Peter Williams
