REF: SOLAR POWER PLANNING APP: BN/29/15/PL

Dear Sirs,

TRAFFIC MANAGEMENT PLAN

I have no objection to the above application as to its visual impact as this seems to have been carefully thought out which cannot be said of the traffic management plan!

Church Lane is very busy; used by pedestrians (including mothers with children in push chairs), cyclists (using the cycling path), cars, delivery vans and enormous vehicles going to the farm.

There isn't any suitable passing areas and you cannot block people's driveways to make them.

I suggest you spend a day in Barnham and Church Lane and see at first hand how difficult your project will be and what chaos it will be both to the users of Church Lane and to Barnham itself.

Yours sincerely,
