

One log pile containing any number of logs to be constructed. The bottom layer will be buried to encourage beetles and earthworms and positioned in an undisturbed location.

One bird box on-site will be installed. Such as the Schwegler 1B or Vivara Pro Seville WoodStone® bird box, or similar equivalents. The box will face between northwest and northeast to avoid direct sunlight and prevailing winds. An integrated brick box could alternatively be installed.

Retained bushes

Retained trees

Rain water collection point

Compost heap

Retained foliage

Retained foliage

CROFT COTTAGE

THE DRIVE

EASTERGATE LANE

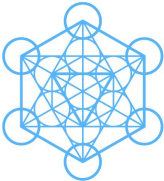

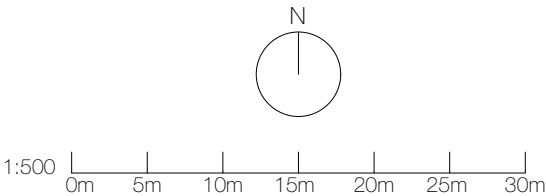

Existing foliage to be managed

Proposed Biodiversity Layout Plan

Disclaimer:
These existing plans have been prepared using a combination of site checks and dimensions taken from previously approved planning drawings. While reasonable efforts have been made to ensure the accuracy of these measurements, they are approximate and cannot be guaranteed. Any critical dimensions should be verified on site before proceeding with construction or further design work.
