

Reference	BN/39/20/PL
Proposal	Erection of 4 No dwellings & associated works. This application is a Departure from the Development Plan.
Location	Land adjacent to Tars Farm House Church Lane Barnham PO22 0DB
Bats	

The lighting scheme for the site will need to take into consideration the presence of bats in the local area and the scheme should minimise potential impacts to any bats using the trees, hedgerows and buildings by avoiding unnecessary artificial light spill through the use of directional light sources and shielding.

The hedgerows on site are used by bats for commuting and foraging and will need to be retained and enhanced for bats. This will include having a buffer strip around the hedgerows (5m) and during construction fencing should be used to ensure this area is undisturbed. Any gaps should also be filled in using native hedge species to improve connectivity. Conditions should be used to ensure this.

Water Voles

Due to the potential presence of water voles within the ditch no works can take place within this ditch or area and a 5m buffer should be set up from the ditch bank and fencing used during the construction period to ensure this area remains undisturbed. If any works need to take place in this area, then activity surveys for water voles will be required along with a mitigation strategy for water voles prior to determination.

Reptiles

Following submission of Preliminary Ecological Appraisal (Feb 2018), we are happy that the mitigation proposed would be suitable. A condition should be used to ensure this takes place.

Nesting Birds

Any works to the trees or vegetation clearance on the site should only be undertaken outside of the bird breeding season which takes place between 1st March – 1st October. If works are required within this time an ecologist will need to check the site before any works take place (within 24 hours of any work).

Badgers

As a precaution any trenches should be covered overnight, or a means of escape made available and any hazardous chemicals need to be suitably stored away so animals cannot access them.

Hedgehogs

As detailed within the Preliminary Ecological Appraisal (Feb 2018) precautions should be put in place for hedgehogs and the site will need to be searched carefully before works begin. If any small mammals including hedgehogs are found they should be relocated away from the construction area into surrounding suitable habitats.

06.07.2020

Ecological Enhancements

In line with Policy ENV DM5 of the Arun District Local Plan information on Biodiversity Net Gain needs to be provided as part of the planning application prior to determination. Though some biodiversity enhancements have been recommended within the Preliminary Ecological Appraisal (Feb 2018) further information is required demonstrating what will be included within the scheme. Examples of what we would be expecting to see include;

- Any trees removed should be replace at a ratio of 2:1
- Wildflower meadow planting used
- Filling any gaps in tree lines or hedgerows with native species
- Bat bricks / tiles are integrated into the buildings onsite facing south/south westerly positioned 3-5m above ground.
- Bird box to be installed on the buildings / and or tree within the garden of the property.
- Grassland areas managed to benefit reptiles.
- Log piles onsite
- We require that gaps are included at the bottom of the fences to allow movement of small mammals across the site
- two hedgehog nesting boxes included on the site

Kind Regards

Liz
