Engineers Comments Regarding Surface Water Drainage

Dear Simon,

I can recommend that Condition 6 relating to application BN/39/20/PL is discharged. This is on the basis that the surface water drainage design does not change as a result of deliberations relating to the Activity Permit which has not yet been issued (but has been applied for). If the drainage design changes as a result of the Environment Agency input then a new Discharge of Conditions application should be made.

All surface water drainage should be constructed in accordance with the following plans:

- D1946 PL300B Drainage GA
- D1946 PL400A Construction Details-sht 1
- D1946 PL400A Construction Details-sht 2
- D1946 PL403 Pond Sections
- D1946 PL100B Proposed Levels
- D1946 PL402 Manhole Schedule & Long Sections

Please do not hesitate to contact me if you have any queries.

Kind Regards

Sarah Burrow
