Notification regarding the above application:

Condition Number 11

Development shall not commence until full details of the maintenance and management of the surface water drainage system is set out in a site-specific maintenance manual and submitted to, and approved in writing, by the Local Planning Authority. The manual is to include details of financial management and arrangements for the replacement of major components at the end of the manufacturer's recommended design life. Upon completed construction of the surface water drainage system, the owner or management company shall strictly adhere to and implement the recommendations contained within the manual.

Reason: To ensure that the proposed development is satisfactorily drained in accordance with policies W DM1, W DM2 and W DM3 of the Arun Local Plan. It is considered necessary for this to be a pre-commencement condition to ensure that the future maintenance and funding arrangements for the surface water disposal scheme are agreed before construction commences.

Decision:

Arun District Council have decided to **REFUSE** details reserved by condition for the following reasons:

Council Drainage Engineers have stated that they cannot currently properly review or agree the proposals for the various reasons set out in their consultation response of 11/06/21 (available on our website). It is acknowledged that this information was not forwarded to you but it was available on the public website. As such, the condition cannot be discharged and you will need to make a revised submission.

Please do not hesitate to contact the above officer if you require any further assistance.

Yours sincerely
