Subject: FW: Contact Request: Shallow attenuation crate under domestic drive with shallow cover

Hi Mike

A 150mm thick reinforced concrete slab of suitable strength should be suitable to protect the AquaCell Core-R units.

Kind regards,
Peter Goundry

Message:

Good afternoon, I am trying to specify a shallow crate system which has to be located under a domestic drive (cars and small vans only). The max invert is 750mm due to a high water table. I hope to use a 400mm deep crate with 350mm cover. The cover can comprise a 100 / 150mm concrete slab for added protection. Can you please advise.
