I wish to comment regarding the above planning application reference.

We live nextdoor to 4 Appletree Drive and think the lower five limbs should be lopped off to give us and neighbouring properties enough light. The tree also needs reducing greatly in size. This would also enable the oak tree to be structurally balanced. It is now 13.10 and our garden is almost completely in shade which makes it difficult to grow fruit and vegetables.

The oak tree is at the right far corner of Irene's garden, very close to our garden and does not affect her light but it does affect us considerably. We need to constantly have our kitchen, utility and dining room lights on.

Last time the tree was maintained and cut, one limb was removed leaving the tree unbalanced. This has caused the problem to three neighbouring properties.

Yours sincerely,

Mrs Laura-Anne Hart
