Technical Support Unit on extn. 37711

26th February 2018

Dear Mr Chris Allington

Development:

Barnham Community Hall's Main car-park is currently a gravel surface. This was a cost reduction when the hall was built (Opened May 2013) and not the preferred solution which would have been block paving or permeable tarmac. The access road, whilst not part of the Community Hall's land, was constructed using block paving and was part of the original planning permission.

The car park has proved to be a noise nuisance to the neighbours and a major accessibility impediment for those with mobility problems. These issues have been difficult for the Trust to manage. Furthermore, after four years the surface is now compacted and is not draining properly. Barnham Community Trust has been raising funds to improve the situation and we are in discussions with a funder for a grant to fund the shortfall.

We are advised by Paul Cann, Senior Engineer, Arun District Council that the best solution is to excavate the car park to facilitate a 350mm layer of Type 3 stone (to act as a water-store and foundation) covered with a permeable surface of either tarmac or block paving.

Location:

Barnham Community Hall Yapton Road BARNHAM

Thank you for your application submitted via the internet on 23rd February 2018. It is being dealt with by the Technical Support Unit and has been allocated the reference number

BN/5/18/PL.

We will contact you shortly with further details.

This letter does not confirm validity of the application/documentation submitted.

Yours sincerely

Miss N Spencer
Technical Support Unit Officer
