Maria,

The attached does confirm that they connected to the public foul sewer.

Thanks,

Laura Gibbons, MEng, GMICE

Dear Ms Tomalova

The applicant has been in discussion with Croudace Homes and obtained the two attached letters from Southern Water confirming that the foul drainage system has been connected directly to the mains drainage, 'underground storage tanks' were not installed.

The statement below from the senior engineer at Croudace also sheds some light on this.

That is correct, at the time of submitting to discharge the planning conditions we were progressing the treatment plant option, however our drainage strategy statement does mention that we were exploring connection to the public sewer with Southern Water. We were in discussions with Southern Water in tandem with the treatment plant option. At some stage during this Southern Water agreed to the direct connection (see attached approval letter and inspection certificate)

Kristoffer Holmes BSc (Hons) IEng MICE
Senior Engineer

We trust that this clarifies the situation and demonstrates that our planning application to develop this site for three dwellings not compromise the existing foul drainage system.

Kind regards

Nicholas Lack (Planning Agent)

Dear Mr Lack,

Thank you for your response.

I am afraid in this instance the confirmation of Croudace Homes is not sufficient.

Working in the planning environment you have to be aware that any changes or modifications should be approved by the Local Authority.

The development site 'Good Acres' has been approved under reference BN/13/14/ and under BN/25/14/DOC the condition 7 (Foul Water System) has been discharged: 'A gravity sewer will collect foul water and convey it to the proposed treatment plant south of the emergency access off Barn Rise.' accompanied by the drawings showing the plant on the site.

If the plant is not in the ground and the changes have been done without consent from the Local Authority, it would be considered as a breach of condition.

Therefore I still insist on the provision of the decision notice from the District Council approving the amended drawings.

Kind regards

Maria

Please provide me with:

Full details of the foul water drainage system constructed as an alternative to the sewage treatment plant that was originally proposed.

And the decision notice from the District Council confirming approval of such system.

After receiving the required information I will re-consult our engineers.

Kind regards

Maria

I am afraid the confirmation Croudace Homes is not enough

Dear Ms Tomalova

The applicant has further consulted with Croudace Homes who confirm that there are no tanks below the site, there is only the one foul sewer that is indicated on the site layout.

Kind regards

Dear Ms Tamalova

In response to your enquiry; the applicant has conferred with Croudace Homes who verify that apart from one foul sewer crossing the site, which we are proposing to divert, nothing else exists below the site to affect our proposed development.

What we think has happened in relation to Laura Gibbons comments, and one of the residents is that originally our application site was earmarked for a sewerage treatment plant but this was never constructed as it was found to be feasible to connect all the houses to the existing foul water sewerage system directly. Perhaps they are citing out of date drainage plans?

We trust that this answers your query and trust that Laura can be re-consulted.

Kind regards

Engineers Comments Regarding Surface Water Drainage

It appears that the documents submitted in support of a discharge of conditions application (reference BN/25/14/DOC) for the wider site indicate that a foul water treatment plant is located in the area of the proposed development. Please can the applicant confirm if this is the case or not. Until such time as this confirmation is provided we object to the application.

Once this is confirmed, please re-consult me.

Regards,

Laura Gibbons, MEng, GMICE
