Subject: Objection to BN/66/19/PL

Good Evening Maria

Following on from my previous objection I would also like it noted that there are two further reasons why this application should not go ahead.

1. The impact upon the current foul water drainage system - this is already thought to be over capacity based on historical backup to a number of properties.

Please see below an extract from our TP1 forms which residents received when we purchased our properties:

"not to overload any of the Service Media on the Retained Land or make any connections to any Service Media which has insufficient capacity to serve the Property or the proposed development to be carried out on the Property"

2. Ownership of the land - the plot on the drawings submitted by Croudace/Seaward do not tie up with plot outline held on the Land Registry records.

This in itself is good reason why this application should be turned down on this occasion until all these problems have been investigated fully and resolved one way or another.

Kind regards
Carol Whitehead
