

## Cherry Trees

### Planting Schedule

#### Hedge Planting

| Common Name | Species Name          | Planting size (cms) | % Mix |
|-------------|-----------------------|---------------------|-------|
| Privet      | Ligustrum Ovalifolium | 60 - 80             | 100   |

One row of 450/600 trainer stock at 0.8-1m centres, 1200 tubex tree shelters, stakes and ties, 8ltrs SHL compost per plant.

#### Hedge Maintenance

##### Year 1

- Planting between November and March
- Tubex tree shelter and rabbit fencing for protection

##### Years 1-5, each year

- Inspect shelters, stakes and ties; loosen and remove as necessary
- Trim hedges annually during correct season to attain a formal shape
- Water hedgerows and shrubs if drought conditions occur
- Replace shrubs which are dead or failing to thrive in winter of each year.
