Subject: BN/88/26/HH Retrospective erection of fencing to front garden between 3 - 4 Hedge End
Barnham

CAUTION: This email originated from outside of the organisation. You should take extra care when clicking links or opening attachments - if you are unsure the content is safe contact the IT Helpdesk before clicking or opening.

Dear Sir/Madam

Please find further objections from No 3 for the above planning permission BN/88/26/HH 4 Hedge End, Barnham, West Sussex, PO22 0JP.

5 Structure of fence is adjoined to front porch (front facing) which is adjoined to our porch as this follows boundary law this is limited to 1 metre (3ft 3") as this is adjacent to road and pathway.

6 Fences of 6ft and 5ft 6" (with gravel board/s) next to porch are back garden fence panels this makes outside our porch overbearing/eyesore and the fences become a dominant feature of the front garden. This then makes this a fortress effect and not open plan. Most front gardens in this road are used as driveways. We lose a lot of sunlight and our view is compromised. At night it becomes very dark and eerie and as there is not much light this could increase the risk for crime ie burglaries and or people acting suspicious outside the property as they are unable to be seen. (My daughter is of a certain age where she comes back late nights and this is not acceptable for her safety).

7 Fences are rigid do not allow flexibility or movement as they have been screwed down so there is a structural risk because they will take the full force of wind etc.

8 My husband works shifts(Freightliner) there is poor street lighting in early hours of morning or late at night his visibility when reversing into the driveway is impaired due to shadows caused by high fences. Road safety and visibility is compromised dramatically during the day and night due to these fences which are above the legal limit as such pedestrians, bikes, mobility scooters, and motor bikes and cars are at serious risk. School children often run or scooter in front of there parents also. A 6ft fence is also erected the other side of No 4 (5 panels 6 ft high) this also causes visibility issues for ourselves and the neighbouring properties.

Please be aware the visibility from our vehicles is compromised as windows are below the legal limit for fence. Cars are different heights so depends on car.(pics can be sent).

Thank you for your consideration. And I hope our valid objections will be seriously looked into. The legal limit is there for a good reason and in our opinion this should be adhered to.

Thank you Mr and Mrs Luckham [REDACTED]
