Dear Mr Dan,

Town & Country Planning Act 1990 (as amended) s211 Notice

Crown reduction to 1 No. Liquid Amber (T1) to leave a height of 7m and spread of 5m. Crown reduction to 1 No. Silver Birch (T2) to leave a height of 8m and spread of 4m. Crown reduction to 1 No. Judas Tree (T3) to previous growth points, leaving a height of 8m and spread of 6m. This application may affect the character and appearance of the Church Lane, Barnham Conservation Area.

Freshfields Church Lane Barnham PO22 0DA

I refer to your recent notification of your intention to carry out the above mentioned works and write to inform you that, after consideration of your proposal, it has been decided not to make a Tree Preservation Order in this case. You may therefore proceed with the works outlined in your notification.

INFORMATIVE: As per section 17, paragraph 4 (a) and (b) of the Town and Country Planning (Tree Preservation) (England) Regulations 2012, this consent is only valid for 2 years and may only be carried out once.

INFORMATIVE: The applicant should note that under Part 1 of the Wildlife and Countryside Act 1981 (as amended), with only a few exceptions, it is an offence for any person to intentionally take, damage or destroy the nest of any wild birds while the nest is in use or being built. Birds nest between March and September and therefore removal of dense bushes, ivy or trees or parts of trees etc. during this period could lead to an offence under the act.

INFORMATIVE: This notice does not give authority to destroy or damage a bat roost or disturb a bat. Bat species are protected under Section 39 of the 1994 Conservation (Natural Habitats etc) Regulations (as amended), the 1981 Wildlife and Countryside Act (as amended) and the 2000 Countryside and Rights of Way Act. It is illegal to damage or destroy any bat roost,

whether occupied or not, or disturb or harm a bat. If you are aware that bats roost in a tree(s) for which work is planned, you should take further advice from Natural England (via the Bat Conservation Trust on 0345 1300228) or an ecological consultant before you start. If bats are discovered during the work, you must stop immediately and contact Natural England before continuing.

INFORMATIVE: Where practicable, pruning works to the Birch should be undertaken during the period of active growth typically during summer or midwinter. Undertaking works during these periods can assist in minimising physiological stress and promoting effective wound response.

I trust this is of assistance to you.

Yours sincerely

A handwritten signature in black ink, appearing to be 'NC' followed by a flourish and a period.

Neil Crowther
Group Head of Planning
