

# **Design & Access Statement for ATM Installation ATM Cardtronics Cashzone**

**E021312**

**Bognor Regis Railway Station Station Road Bognor Regis PO21 1QF**

## **Introduction**

This Design and Access Statement has been prepared on behalf of Cardtronics Cashzone in support of an application submitted for the installation of an Automated Teller Machine and illuminated signage.

The initial purpose of the proposal is to provide 24 hour banking facilities for passengers using Bognor Regis Railway Station.

As this installation is for an ATM within the existing external façade, some aspects such as “layout” and “Access” are of limited applicability.

## **Design Principles**

### **Design**

The site is the overland Railway Station in Bognor Regis. The installed ATM provides direct and unobstructed access and has been installed through the second window to the right of the entrance with “News” sign and arched brickwork detail above on the platform side of the building, through the existing aperture to the bottom of the window. Procash Wincor 2050 ATM fascia with Cashzone illuminated polycarbonate black and green top sign and illuminated green acrylic ATM fascia sign. The ATM was installed on 19<sup>th</sup> December 2017.

### **Design Principal**

The ATM is of a standard design as located in many areas throughout the UK and is accepted as a necessary facility. There are a number of mandatory standards which apply relating to the position of the ATM, its visibility, ambient lighting, building structure, security features, ATM anchoring and ATM safe security and strength.

### **Scale**

The dimensions of the installation are:-

ATM top sign has been set at a height of 1791mm from the pavement level to the underside of the top sign.

Sign Height 310mm. Width 636mm. in black and green polycarbonate with white internally illuminated lettering and halo illumination.

ATM fascia green acrylic sign has been set at a height of 1617 mm from the pavement level to the underside of the sign.

Signage Height 171mm. Width 466mm in green acrylic with white internally illuminated Cashzone lettering and accepted card logos.

The display screen is carefully shielded from ambient lighting to prevent glare and reflection, ensuring a clear and sharp image is visible by both standing and seated users.

### **Planning**

Bognor Regis Railway Station Station Road Bognor Regis is not believed to be within a Conservation Area or is a Listed Building.

### **Layout**

The ATM has been installed at a suitable height in order that the cash dispenser can be easily accessed, in accordance with DDA regulations.

### **Landscaping**

Due to the nature of the proposal, we feel the application will not benefit from any landscaping.

### **Appearance**

The installed ATM is a standard Procash Wincor 2050 Pro Cash design with Cardtronics Cashzone black and green polycarbonate top sign with illuminated lettering and halo illumination and green acrylic ATM fascia sign.

### **Access**

The installed ATM has good access for the public. Due to the flat surface to the frontage and its position within the frontage.

The installation has been designed to anticipate and overcome the restriction that would prevent disabled persons from making full use of the service to be provided together with the needs of more vulnerable people from protection of attack and intimidation.

The ATM is set at a height that makes it accessible for wheel chair users. Key 5 has raised markings for blind persons to identify the centre key.

There is sufficient area in front of the proposed ATM for easy access clear off passenger pedestrian movement on the platform.

### **Crime Prevention**

Cardtronics Cashzone carry out an end to end solution using Cash in Transit (CIT) and engineering staff, our security managers consider the following for every installation deliveries, parking outside the unit and line of sight of the replenishment for the staff.

Cardtronics Cashzone believe that their standard working practices and the implementation of the above crime prevention measures help to provide a safe and sustainable development.

### **Conclusion**

The installed ATM has the principal benefit to the community of providing cash on demand to the passengers at Bognor Regis Railway Station Station Road Bognor Regis.
