Dear Stuart,

Further to our telephone conversation earlier I have looked at the application and I attach recent photographs of the kitchen extract system fitted by Filter Craft with activated carbon and ESP installed. The extract is working well and no complaints received to EH. I am satisfied with what extract system has been fitted and the maintenance programme for the system. The owner of the business has use of communal waste bins and has also ordered additional waste bins for his use only e.g. food waste bin and bins for recycling and glass stored in the rear yard.

I am happy to do a joint visit if still needed and to let you know the owner is to go on holiday shortly but can be around if notified in advance. Hope this helps.

Kind Regards
Nick Howard
SEHO
