

**History of Arun District Council's Building Control Inspections
65c (Land Adj to 65b) Gravits Lane, Bognor Regis, West Sussex PO21 5LW**

With reference to Arun District Council's building approval of foundation work for the above property, in 2014, I submitted a full Building Regs application along with the plan fee, (£172), and inspection fee, (£504). The first excavated section of footings were inspected on 1 Aug 2014 under application number BR/188/14/BR. The remaining section of footings were excavated and inspected on the 30 March 2016 under a new file: BR/312/17/BR.

There has been a further inspection carried out on site in February 2018 of footings, oversight and DPC under BR/312/17/BR.

The foul water drainage connection was inspected under BR/188/14/BR post 17th December 2014 and pre 17th December 2017 by Richard Windust.
