Simon,

I still can't understand how I missed the noise report before? I also do not recall any discussions with the report's author (3.01).

I would concur with the conclusion of the report that no expected adverse impact to existing residential amenity at 86 Hilsboro Road will be caused by the plant operation. It is probably unlikely that there will be significant impact upon other sensitive receptors. However, the report dismisses the closer existing residential dwelling above the store as the worst affected receptor as it is screened by the rear elevation of the building (2.04) with, in my view, insufficient justification. I would suggest further clarification is necessary.

Regards

Graham
