Subject: RE: BR/120/19/PL, BR/121/19/L, The Bandstand

Maria,

I can confirm the following:

- **Relocation of access gate.** The Bandstand has previously been disassembled and re-assembled and is not in its original location. There is no particular historic or architectural significance related to the current positioning of the access gate except that it faces directly onto the seafront. The balustrading and handrail (and associated access gate) are relatively interchangeable between the main structural support posts as the structure is a regular, symmetrical shape. The relocation of the gate will position it where there is currently an access step, which would seem an entirely logical location as this position would enable easy access and egress without disturbing the main thoroughfare along the promenade.
- **Perspex sheeting.** I can confirm the Perspex sheeting that was proposed to the metal railings has now been omitted from the proposals.
The proposed Perspex sheeting at high level will be fitted on the inside face of the decorative ironwork and is required to prevent rainwater penetration into the roof structure and onto the proposed ceiling. This Perspex sheeting will be clear and would barely be visible from ground level. It will be fixed in a manner to enable removal on a future occasion to ensure the work is entirely reversible.
- **Timber ceiling boarding.** The new timber boarding will be fitted to existing horizontal metal framework and would have a painted finish.
- **Materials.** We accept that a suitably worded condition will need to be applied to agree the details of the new bricks and other items.

Please let me know if you have any further comments or questions.

Thanks,

Phil.

Hi Phil,

Please find below the comments of our Conservation Officer:

The proposal will ensure that missing railings and ceiling details will be reinstated. Such a proposal will therefore have a positive impact upon the listed building.

However, there are some issues which require clarification. It is not clear from reviewing the information why the location of the gate is to change.

Further, scant information has been provided regarding the proposed Perspex sheeting; how will it be fixed to the structure? Will it form a permanent element of the structure, or will it be used on a temporary basis (and removed when not required)? Further, what size will the panels be? What would the quality of the materials used be? At present, such an issue is considered to be problematic.

Also how will the horizontal timber boarding to be fitted below the roof structure to form a ceiling be treated?

Based on the information currently provided as part of the application, details of the proposed red bricks to be used to replace those used for the brick plinth will need to be provided. Further, all of the colours to be used should be agreed with the LPA.

A copy of this assessment and of any new information which comes to light during alterations and construction should be offered to the Historic Environment Record of Arun District Council.

At the moment, there are a number of questions where the information should be provided, prior to determination so that the impact of the proposal can be assessed and the level of harm identified.

Bognor Regis Town Council Committee will be held on 29 October; I have sent to Joanne Davis your amended drawings

and will send her your response on CO comments. It would be better if we have their support since as you could see they objected application.

Kind regards

Maria
