Subject: Planning Consultation on: BR/129/21/OUT

Response to Planning Application

From: Arun District Council Greenspace

Date: 12 July 2021

Application ref: BR/129/21/OUT

Description: Outline application with all matters reserved for 10 new dwellings consisting of 1 No. 1 bed property, 8 No. 2 bed properties and 1 No. 4 bed property with associated services, landscaping, car parking & amenity (resubmission following BR/190/20/OUT).

Location: 26 Burnham Avenue Bognor Regis PO21 2JU

Determining Authority: Arun DC

Summary recommendation: Advise that the proposals would result in significant impact on the existing street scene, so landscape mitigation would be required. Subject to approval of these details, I would recommend **no landscape objection** to the proposals.

Comments – Consultation response under application BR/190/20/OUT remain relevant and valid

Relevant landscape designations:

The site is presently the setting of an existing premise, the proposal is to demolish the existing and extend the footprint within the plot.

There are no physical, visual, historical or cultural links, protected landscapes, scheduled ancient monuments, conservation area or Historic Parks or Gardens associated with this site. The site is located within a presently existing residential area. The existing dwelling appears fitting to location and blends within the neighbourhood.

Response

The proposed site is an existing dwelling located in an established residential area. There is established green infrastructure within the footprint of the development proposal. This site was subject to an application BR/190/20/OUT and previously withdrawn application BR/49/19/OUT and the landscape consultation comments made under those applications remain valid.

There would be considerable effect on the street scene with these proposals. The proposals indicate that some removal of greening to the frontage would be required for the development. The proposals show the retention of established trees within the rear of the property, these would require protection during construction if they are to remain undamaged. Any tree removals would need to be in consultation with Arun District Councils Tree Officer.

The existing trees in particular along the boundaries and to the north/east of the proposals provide potential valuable screening and could be compromised by these proposals. Root Protection Areas (RPA) should extend into the development site and to those in neighbouring land. Before construction, a tree protection scheme must be in place for any adjacent trees whose root protection areas fall within the construction zone from neighbouring land. This should be in accordance with BS 5837:2012 'Trees in relation to construction'

There would appear to have been consideration within this application for communal amenity outdoor space which is good to see. There would be requirement for the submission of a landscape scheme which should be submitted for approval, detailing plant species choice, position, densities and size at time of planting. This should be plotted in plan and list form and in relation to the trees and vegetation to be retained in the locale, so that a clear picture of the proposals can be seen. These details are required to assure the proposals are appropriate to its setting and to ensure that appropriate screening is provided, maintaining and uncompromising the setting and ensuring that the proposals fit within the area of neighbouring and adjacent properties.

If this is a Non CIL liable development then the following would apply:

No requirement or trigger for the provision of Public Open Space or Play on site with this development, however Arun District Councils Design Guide would suggest that flatted developments still have access to outdoor space provision. Section 106 monies should be sought for recreation and leisure facilities as detailed in our SPD Open Space, Playing Pitches, Indoor and Built Facilities January 2020

This 10 no unit flat development should generate $10 \times £1971.20 = £19,712.00$ for offsite POS as a 106 contribution (location to be advised)

This 10 flat development should generate $10 \times £1730.30 = £17,303.00$ for offsite Play as a 106 contribution (location to be advised)

Impact

The potential impact of the proposals would need to blend into the surrounding environment therefore there would be the need for onsite green infrastructure and mitigation soft landscaping.

Mitigation/requirements

Further onsite landscape mitigation, offsite 106 contributions for recreation and leisure facilities.

Recommendation/Conclusion

Advise that the proposals would result in significant impact on the existing street scene, so landscape mitigation would be required. Subject to approval of these details, I would recommend **no landscape objection** to the proposals.
