Simon,

Thanks, no objection would be raised however I would suggest that the scheme is modified as if they are twin pod chargers it would make sense to move them to between the first and second space so they could easily serve four spaces rather than require cables to be trailed across or around the top space.

Stephen.

Dear both,

I have issued a re-consultation on this application concerning the electric car charger plan that has been received. Unfortunately the consultation refers to solar panels as I have made two sets of changes to the system today but the purpose of the consultation is to seek comments on this plan (which is also on our website).

Hope that's ok.

Simon.
