2 Site Address

Rear of 94-100 Hook Lane
 Bognor Regis
 PO22 8AT

3 Description of Development

Outline application with some matters reserved for the demolition of 1 No. existing dwelling to form access for 6 No. residential dwellings. This application affects the setting of listed buildings & affects the character & appearance of the Upper Bognor Road & Mead Lane Conservation Area.

In pursuance of their powers under this Act and related Orders and Regulations the Council **PERMIT** this development to be carried out in accordance with the application and plans and subject to the following conditions

- 1 The development hereby permitted shall be begun either before the expiration of 3 years from the date of this permission, or before expiration of 1 year from the date of approval of the last of the reserved matters to be approved, whichever is the later.

Reason: To enable the Local Planning Authority to control the development in detail and to comply with Section 92 of the Town and Country Planning Act 1990 (as amended).

- 2 The permission hereby granted is an outline permission under s92 of the Town and Country Planning Act 1990 (as amended) and an application for the approval of the Local Planning Authority to the following matters must be made not later than the expiration of 2 years beginning with the date of this permission:-
- (a) Layout;
 - (b) Scale;
 - (c) Appearance;
 - (d) Landscaping.
- Reason: To enable the Local Planning Authority to control the development in detail and to comply with Section 92 of the Town and Country Planning Act 1990 (as amended).
- 3 The development hereby approved shall be carried out in accordance with the following approved plans:
- Site Location Plan
Feasibility Site Plan
- Reason: For the avoidance of doubt and in the interests of amenity and the environment in accordance with policy D DM1 of the Arun Local Plan.
- 4 No development approved by this planning permission shall take place until such time as a floodplain compensation scheme has been submitted to, and approved in writing by, the local planning authority.
- The scheme shall be fully implemented and subsequently maintained, in accordance with the timing / phasing arrangements embodied within the scheme, or within any other period as may subsequently be agreed, in writing, by the local planning authority.
- Reason: To reduce the risk of flooding to the proposed development and future users and to prevent flooding elsewhere by ensuring that compensatory storage of flood water is provided in accordance with policy W DM2 of the Arun Local Plan.
- 5 No development approved by this planning permission shall take place until such time as information on detailed design and maintenance regime for the proposed voids beneath the buildings (including size, location and appearance) has been submitted to, and approved in writing by, the local planning authority.
- Reason: To reduce the risk of flooding to the proposed development and future users and to prevent flooding elsewhere by ensuring that compensatory storage of flood water is provided in accordance with policy W DM2 of the Arun Local Plan.

- 6 The development permitted by this planning permission shall be carried out in accordance with the approved Flood Risk Assessment (FRA) (WSP, July 2018) and letter dated 28/08/2018, and the following mitigation measures detailed within the FRA:

- Finished floor levels are set no lower than 300mm above 2.19m AOD (above Ordnance Datum).

The mitigation measures shall be fully implemented prior to occupation and subsequently in accordance with the timing / phasing arrangements embodied within the scheme, or within any other period as may subsequently be agreed, in writing, by the local planning authority.

Reason: To reduce the risk of flooding to the proposed development and future users and to prevent flooding elsewhere by ensuring that compensatory storage of flood water is provided in accordance with policy W DM2 of the Arun Local Plan.

- 7 Development shall not commence, other than works of site survey and investigation, until full details of the proposed surface water drainage scheme have been submitted to and approved in writing by the Local Planning Authority. The design should follow the hierarchy of preference for different types of surface water drainage disposal systems as set out in Approved Document H of the Building Regulations, and the recommendations of the SuDs Manual produced by CIRIA. Winter groundwater monitoring to establish highest annual ground water levels and Percolation testing to BRE 365, or similar approved, will be required to support the design of any Infiltration drainage. No building / No part of the extended building shall be occupied until the complete surface water drainage system serving the property has been implemented in accordance with the agreed details and the details so agreed shall be maintained in good working order in perpetuity.

Reason : To ensure that the proposed development is satisfactory drained in accordance with policies W SP1, W DM1, W DM2 and W DM3 of the Arun Local Plan. It is considered necessary for this to be a pre-commencement condition to ensure that the surface water disposal scheme is agreed before construction commences.

- 8 The development shall not proceed until formal consent has been approved in writing from the Lead Local Flood Authority (WSCC) or its agent (ADC) for the discharge of any flows to watercourses, or the culverting, diversion, infilling or obstruction of any watercourse on the site. Any discharge to a watercourse must be at a rate no greater than the pre-development run off values.

Reason : To ensure that the proposed development is satisfactorily drained in accordance with policies W DM1 and W DM2 of the Arun Local Plan. It is considered necessary for this to be a pre-commencement condition to protect existing watercourses prior to the construction commencing.

- 9 Development shall not commence until full details of the maintenance and management of the surface water drainage system is set out in a site-specific maintenance manual and submitted to, and approved in writing, by the Local Planning Authority. The manual is to include details of financial management and arrangements for the replacement of major components at the end of the manufacturer's recommended design life. Upon completed construction of the surface water drainage system, the owner of management company shall strictly adhere to and implement the recommendations contained within the manual.

Reason : To ensure that the proposed development is satisfactorily drained in accordance with policies W DM1, W DM2 and W DM3 of the Arun Local Plan. It is considered necessary for this to be a pre-commencement condition to ensure that the future maintenance and funding arrangements for the surface water disposal scheme are agreed before construction commences.

- 10 Prior to the commencement of development approved by this planning permission (or such other date or stage in development as may be agreed in writing with the Local Planning Authority), the following components of a scheme to deal with the risks associated with contamination of the site shall each be submitted to and approved, in writing, by the local planning authority:

1. A preliminary risk assessment which has identified:
all previous uses potential contaminants associated with those uses
a conceptual model of the site indicating sources, pathways and receptors
potentially unacceptable risks arising from contamination at the site.
2. A site investigation scheme, based on (1) to provide information for a detailed assessment of the risk to all receptors that may be affected, including those off site.
3. The site investigation results and the detailed risk assessment (2) and, based on these, an options appraisal and remediation strategy giving full details of the remediation measures required and how they are to be undertaken.
4. A verification plan providing details of the data that will be collected in order to demonstrate that the works set out in (3) are complete and identifying any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.

Any changes to these components require the express consent of the local planning authority. The scheme shall be implemented as approved.

Where demolition is required 1. and 2. above should be submitted prior to demolition. Parts 3. and 4. can take place post demolition if necessary.

Reason: To ensure that the development complies with approved details in the interests of protection of the environment and prevention of harm to human health in accordance with Arun Local Plan policies QE SP1 and QE DM4. This is required to be a pre-commencement condition because these details have to be agreed and in place before any work commences.

- 11 The development layout shall not be agreed until such time that arrangements for the future access and maintenance of any watercourse or culvert (piped watercourse) crossing or abutting the site has been submitted and approved in writing by the Local Planning Authority. No construction is permitted, which will restrict current and future land owners from undertaking their riparian maintenance responsibilities of any watercourse on or adjacent to the site.
- Reason : To ensure that the duties and responsibilities, as required under the Land Drainage Act 1991, and amended by the Flood and Water Management Act 2010, can be fulfilled without additional impediment following the development completion, in accordance with Policies W DM1, W DM2 and W DM3 of the Arun Local Plan.
- 12 No development shall commence until the vehicular access serving the development has been constructed in accordance with the approved planning drawing.
- Reason: In the interests of road safety in accordance with policy TSP1 of the Arun Local Plan.
- 13 No part of the development shall be first occupied until pedestrian visibility splays of 2 metres by 2 metres have been provided either side of the proposed site vehicular access onto Hook Lane in accordance with plans and details submitted to and approved in writing by the Local Planning Authority. These visibility splays shall thereafter be kept free of all obstructions over a height of 0.6 metre above adjoining carriageway level or as otherwise agreed.
- Reason: In the interests of road safety in accordance with policy TSP1 of the Arun Local Plan.
- 14 No development shall be commenced until such time as plans and details have been submitted to and approved in writing by the Local Planning Authority showing the site set up during construction. This shall include details for all temporary contractors buildings, plant and stacks of materials, provision for the temporary parking of contractors vehicles and the loading and unloading of vehicles associated with the implementation of this development. Such provision once approved and implemented shall be retained throughout the period of construction.
- Reason: To avoid undue congestion of the site and consequent obstruction to access in accordance with policy TSP1 of the Arun Local Plan.

- 15 No development shall be carried out on the site unless and until an effective vehicle wheel-cleaning facility has been installed in accordance with details provided by the Local Planning Authority and such facility shall be retained in working order and throughout the period of work on site to ensure the vehicles do not carry mud and earth on to the public highway, which may cause a hazard to other road users.

Reason: In the interests of road safety and the amenities of the area in accordance with policies T SP1, QE DM3 and D DM1 of the Arun Local Plan 2011-2031. It is considered necessary for this to be a pre-commencement condition as these details must be agreed before the impacts of construction begin.

17

Informative

Vehicle Crossover - Minor Highway Works

The applicant is advised that in addition to obtaining planning permission that they must also obtain formal approval from the highway authority to carry out the site access works on the public highway. The granting of planning permission does not guarantee that a vehicle crossover licence shall be granted. Additional information about the licence application process can be found at the following web page:

<https://www.westsussex.gov.uk/roads-and-travel/highway-licences/dropped-kerbs-or-crossovers-for-driveways-licence/>

Online applications can be made at the link below, alternatively please call 01243 642105.

INFORMATIVE: Drainage Engineers advise that Infiltration rates for soakage structures are to be based on percolation tests undertaken in the winter period and at the location and depth of the proposed structures. The percolation tests must be carried out in accordance with BRE 365, CIRIA R156 or a similar approved method and cater for the 1 in 10 year storm between the invert of the entry pipe to the soakaway, and the base of the structure. It must also have provision to ensure that there is capacity in the system to contain below ground level the 1 in 100 year event plus 30% on stored volumes, as an allowance for climate change. Adequate freeboard must be provided between the base of the soakaway structure and the highest recorded annual groundwater level identified in that location. Any SuDS or soakaway design must include adequate groundwater monitoring data to determine the highest winter groundwater table in support of the design. The applicant is advised to discuss the extent of groundwater monitoring with the Council's Engineers. Supplementary guidance notes are also available on request.

INFORMATIVE: Statement pursuant to Article 35 of the Town and Country Planning (Development Management Procedure)(England) Order 2015. The Local Planning Authority has acted positively and proactively in determining this application by assessing the proposal against all material considerations, including planning policies and any representations that may have been received and subsequently determining to grant planning permission in accordance with the presumption in favour of sustainable development, as set out within the National Planning Policy Framework.

IT IS IMPORTANT THAT YOU READ THE NOTES ATTACHED TO THIS DOCUMENT

APPEALS TO THE SECRETARY OF STATE

If you are aggrieved by the decision of your local planning authority to refuse permission for the proposed development or to grant it subject to conditions, then you can appeal to the Secretary of State under section 78 of the Town and Country Planning Act 1990.

If this is a decision on a planning application relating to the same or substantially the same land and development as is already the subject of an enforcement notice, and you want to appeal against this planning application decision, then you must do so within 28 days of the date of this notice.

If an enforcement notice is served relating to the same or substantially the same land and development as in your application and you want to appeal against this planning application decision, then you must do so within 28 days of the date of service of the enforcement notice, or within 12 weeks of the date of this notice, whichever period expires earlier.

Otherwise, if you want to appeal against this decision then you must do so within 6 months of the date of this notice.

Appeals must be using a form which you can get from the Secretary of State at Temple Quay House, 2 The Square, Temple Quay, Bristol BS1 6PN (Tel: 0303 444 5000) or online at <http://acp.planninginspectorate.gov.uk>

The Secretary of State can allow a longer period for giving notice of an appeal but will not normally be prepared to use this power unless there are special circumstances which excuse the delay in giving notice of appeal.

The Secretary of State need not consider an appeal if it seems to the Secretary of State that the local planning authority could not have granted planning permission for the proposed development or could not have granted it without the conditions they imposed, having regard to the statutory requirements, to the provisions of any development order and to any directions given under a development order.

PURCHASE NOTICES

If either the local planning authority or the Secretary of State refused permission to develop land or grants it subject to conditions, the owner may claim that he can neither put the land to a reasonably beneficial use in its existing state nor render the land capable of a reasonably beneficial use by the carrying out of any development which has been or would be permitted.

In these circumstances, the owner may serve a purchase notice on the Council (that is, where the land is situated in a National Park, the National Park authority for the Park, or in any other case the district council in whose area the land is situated). This notice will require the Council to purchase the owner's interest in the land in accordance with the provisions of Chapter 1 of Part VI of the Town & Country Planning Act 1990.

Please note that this decision notice only relates to matters under the Planning Acts and does not give consent under any other legislation that may apply to the development. You will need to carry out your own checks to determine whether any other consents or permissions are required. For example, the Building Regulations are likely to apply to most developments, and a Highways Licence may be required from West Sussex County Council for any development within the
