Ella

You already have the existing elevations of the conservatory, they are in the attached, so as not to cause you more confusion I've change the existing plan in this file for the latest one I sent you yesterday

You are making this really hard work of this for some irrelevant details

Hi Keith,

Thank you for the additional information, the existing floor plan that you sent now shows the conservatory fenestrations, could you please amend the existing elevation plans to reflect what the floor plan is showing.

Many Thanks,

Ella Summerfield.

Hi Keith,

The plans have to stay consistent regardless.

Thanks,

Ella

Hi Keith,

Thank you for the additional information, the only thing holding back this application being validated now is the fenestrations of the conservatory need to be drawn on the existing floor plan, below are the relative images.

If you have any questions, feel free to email me.

Thanks,

Ella Summerfield.
