Dear Sir or Madam,

**Application for Landscape Works at Dome House, University of Chichester, Upper Bognor Road
Bognor Regis: Relocation of Car Park and Rebuilding of Historic Wall.**

I enclose drawings and documents for the planning application for the above works, which form part of landscape improvements to the grounds of Dome House. The grounds have been used as gardens since the house was first built c. 1790, but had become neglected and the University now wishes to upgrade the gardens through woodland management, moving the car park from the front to the side of the building, and developing the rear garden for leisure use.

A landscape masterplan has been included which shows details of the plant beds and plant species to be used, as well as the paving, proposed car park and rebuilt wall. More detailed drawings are included showing details of the wall and the car park.

An application for tree felling has already been approved and the work has been carried out. A Conservation Area Notification is included in this application. A number of trees have already been removed with permission and a further numbers are proposed to be removed within the tree management programme. These are mainly poor or suppressed specimens and will be replaced with more traditional species, including natives, which are appropriate to the site.

Documents enclosed are:

Planning Application
Validation Criteria
Validation Checklist
Design and Access Statement
Tree Survey
Site plan
Block Plan
Landscape Masterplan
