18th June 2020

Dear Sir/Madam

**PRE-APPLICATION CONSULTATION – RADIO BASE STATION
INSTALLATION AT MBNL_ARN004 VICTORIA ROAD/CHICHESTER RD,
BOGNOR REGIS, WEST SUSSEX, PO22 9LQ. NGRs E:493470 N:99960**

I write in response to your letter, dated 8th June 2020, and would like to thank you for consulting us on this matter. The Town Council's Planning and Licensing Committee considered the information provided by you, at their meeting held on 16th June 2020.

During discussion, some Committee Members expressed concern about the possible health implications of 5G technology and questioned whether sufficient scientific research has been undertaken to satisfactorily allay such concerns. However, the need for 5G service for businesses etc. was also raised as a consideration.

Additionally, Members discussed the potentially negative impact of the proposed installation, due to its size and appearance, to residents living within the immediate vicinity. Although it's acknowledged that this planned upgrade is on a site at which equipment is presently located, is it at all possible that an alternative site, that would lessen the impact on local residents, could be considered?

I look forward to your reply.

Yours sincerely

Jo Davis

Civic & Office Manager/Planning and Licensing Committee Clerk

TOWN MAYOR: Councillor Phil Woodall

DEPUTY MAYOR: Councillor Steve Goodheart
