Subject: Re: The Lodge - BR/158/17/L

Hi Richard

Further to Angela Haywood's response, I would reply as follows:-

- 1)
Proposed levelling of floor. Please see attached photo showing that the existing living room floor is of a modern concrete construction and therefor any required levelling would not impact on the heritage asset.
- 2)
Details of the 3 New doors to existing openings, can this be a condition, as suggested by Angela.
- 3)

New wash hand basin in covered courtyard and installation of shower cubical in store adjacent to stairs. Both these items are shown on the floor plan IBA/462/02 currently on the website. If further details are required can these again be a planning condition.

4)

The verandah. This has been reduced in size as suggested. The verandah will be secured to the existing wall with 5 x M10 masonry bolts, with the length of the abutment sealed with silicon sealant, to avoid any damaging works to the heritage asset, see attached drawings.

5)

The proposed new window in dinning room has been deleted, see attached drawings.

I trust the above and attached documents are to your approval.

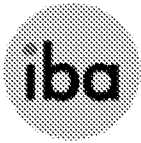

If you have any further queries please do not heist to contact me.

PS. I have copied Angela Haywood in on this e-mail.

Kind regards

Ivon
