COMPACT CYCLE BIKE BICYCLE SHELTER

Uses semi vertical style bike storage

Bike secured with D Lock

Compact /Narrow Depth Shelters - Frame Depth at ground level only 1.1 metres

Space Saving Bike Shelters with small size base ideal for confined spaces, residential developments, blocks of flats etc.

Shelters without bike rack - Can also be used to provide a covered smoking shelter, weather protection for refuse bin or waiting areas, shelter pay & display or vending machines and many other applications you may think suitable.

- STRONG MINIMAL STEEL FRAMEWORK - HIGH VISIBILITY - AESTHETICALLY ATTRACTIVE

Steel box section frames and purlins, choice of finishes either weatherproof hot dipped galvanising or optional extra colour powder coating on top of galvanising in a range of colours.

Choice of pre-drilled base plates for surface fixing or extended uprights with stop plates for concreting into ground/submerged fixing

Roof and rear - Clear exterior grade UV stable polycarbonate panels are virtually unbreakable, Class 1 fire protection and won't discolour in sunlight.

Designed to use semi-vertical cycle storage, with alternate high/low bike rails, for greater density (racks are unsuitable for cycles with full mudguards but will accept small splash guards front and / or rear).

Optional :

Clear polycarbonate end/side panels for additional weather protection.

Lockable gates for security.

Shelter framework with colour powder coating on top of galvanising in a range of colours.
