Subject: RE: Planning Consultation on: BR/176/20/PL

Dear Planning,

Comments from Private Sector Housing:

The new building must comply with current Building Regulations.

Fire Safety

- Appropriate fire precaution facilities and equipment must be provided of such type, number and location as are considered necessary.
- Whilst the following guidance is intended for existing blocks of flats, once a block becomes occupied, the guidance becomes applicable: "Local Government Association – Fire Safety in Purpose Built Blocks of Flats".
- The internal staircase is the primary and single means of escape from the flats, therefore it must be protected along it's entire length from the effects of fire with 60 minutes

compartmentation and each flat entrance door fitted with a minimum FD30S compliant fire door which is self-closing, fitted with 3 fire-rated steel hinges, intumescent strips and cold smoke seals. Any cupboards/storage areas located on the escape route must also be adequately fire resisting.

- Windows opening at a height of >4.5 metres should be fitted with opening restrictors, limiting the opening so that a 100mm sphere cannot pass through.
- There should be a minimum of 60 minutes fire resistance between each flat horizontally and vertically (walls ceilings and floors).
- Grade D, LD3 fire alarm and detection system individual to each flat:
 - o interlinked mains wired smoke alarms with integral battery back-up located throughout the escape route of each flat (entrance lobby and hallway)
 - o Interlinked heat alarms with integral battery back-up are recommended in each kitchen
 - o Fire blankets are recommended in each kitchen
- The storage cupboards in each flat entrance lobby should not contain sources of ignition, such as electrical installations, in order to provide a safe means of escape from each flat. If sources of ignition are to be present in these cupboards, then they should be made adequately fire-resisting to protect the means of escape.
- Communal fire alarm and detection systems are not common in purpose built blocks of flats, however the applicant must consult with the relevant guidance documents, West Sussex Fire & Rescue Service and Building Control to establish the most appropriate fire safety precautions for this property.

Room Sizes

- Room sizes should meet the minimum standards if the flats are intended to be rented.
- The floor to ceiling height must be at least 2.1 metres from floor to ceiling over at least 50% of the floor area when measured at a height of 1.5 metres from the floor and provide sufficient useable space.
- Note with regards to bedroom sizes:
 - 6.51sqm – suitable for 1 person
 - 10.2sqm - suitable for 2 persons
- Note with regards to children and how they fit into room size calculations:
 - Babies up to the age of 1 are discounted
 - Children aged 1 -10 years are classed as half a person
 - Children aged over 10 years are classed as a person

Licensing

- Any property that has 5 or more people sharing facilities will require a license from the Council and the property must meet minimum standards.

Ventilation

- Any bathrooms and kitchens without windows for natural ventilation should have adequate mechanical ventilation.

- All habitable rooms must have an opening window, equivalent to 1/20th of the floor area, to the outside air to provide adequate ventilation. French or patio doors that have no separate openable casements, or where there is no alternative openable casement within the room, are not considered acceptable in bedrooms.

General

- Must meet the requirements of the Housing Act 2004 and be free of Category 1 and significant Category 2 Hazards;
- Must meet the requirements of the Arun District Council Houses in Multiple Occupation Standards (2020), where applicable ;
- Must meet the requirements of any other associated Housing and/or Houses in Multiple Occupation legislation or regulations, where applicable;
- Must meet the requirements of The Licensing and Management of Houses in Multiple Occupation and other Houses (Miscellaneous Provisions) (England) Regulations 2006 (as amended), where applicable;

No grant of Planning or Building Regulations is inferred or implied and it should be noted that the Housing Standards, including room sizes and facilities must be complied with. In cases where it is found that Housing Standards have not been met, this may result in enforcement action being taken by the Private Sector Housing department. The applicant should also be aware that the assessment at this time does not prevent the Council from taking future enforcement action in relation to any hazards identified now or at a future date, including once construction or conversion has taken place or with changes in National or Local legislation, guidance or requirements.

Kind regards

Martin Hill

**It is a criminal
offence to operate
a licensable HMO
without a licence**

Landlords must apply for a mandatory HMO licence if their property is occupied by five or more people in two or more households regardless of the number of storeys.

If you own/manage a house in multiple occupation subject to the new legislation and require more information please visit www.arun.gov.uk/hmo

If you suspect an HMO is operating without a licence, or are concerned about the standards of an HMO, please contact us.

Please note that during the current Coronavirus pandemic and contingency measures being implemented including working remotely there may be limited access to incoming and outgoing mail, so if possible please send all correspondence via e-mail. Please also note that to protect staff and customers from unnecessary potential exposure, apart from essential urgent emergency situations,

property inspections and site visits are unable to be undertaken at this time.
