Dear Mr Perry,

Planning and Listed Building Applications BR/17/12 and BR/179/12/L

The window details as submitted have informally been agreed with Ian Wightman and myself. However, you or your client will need to submit two applications for discharge of conditions on the Planning and Listed Building Consent. This will involve samples for the external walls and roofs to be submitted, details of the windows and details of the structural join between the existing and proposed roof structures.

The Application for approval of details reserved by condition for Planning and Listed Buildings forms are available on the council's website. There is not charge for the Listed Building Application but a fee of £28.00 is payable for the planning application which at the present time is £28.00.

Regards

Janice Chapman
Planner

Dear Mrs Chapman

This project has undergone a Tendering process and any decision on how to proceed further rests without Clients, of course. We believe we have specified external materials and details (such as windows, roof tiling and rendering) in accordance with your requirements. However, it is not clear that we will have the responsibility of seeking your approval of samples prior to construction.

Very many thanks for your and Dr Wightman's assistance in achieving a design solution for the proposed extension to the building.

Best regards,
Anthony
