Great crested newts☐☒**Has the site been surveyed for great crested newts?***☐☒**Is there suitable habitat for great crested newts on, or close to the application site?***

Great crested newts are often recorded in ponds, reedbeds, ditches and mineral workings. Terrestrial habitat used by newts is varied and includes semi-natural grassland, woodland, hedgerows and pasture and are often found in urban sites including gardens. Further guidance on great crested newts can be found in the Great Crested Newt Mitigation Guidelines from:
