Gentlemen

Large Holm Oak in the corner of my garden

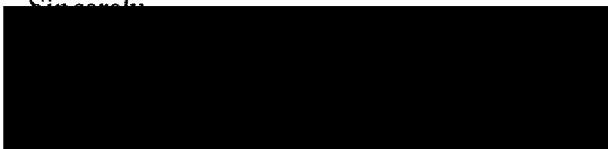

I wish to reduce this very large tree, circled on the enclosed Google view, by around 30% for three reasons:

1. It has become very large and dense, and needs to be thinned and the crown opened up and reduced, and parts of it are dead
2. It largely shades most of the garden early evening onwards, denying light to other plants
3. Our neighbours in Arran Gate are concerned that some large branches overhang their three visitor parking spaces (high-lighted) and damage may be caused if a branch fell off

Holm Oaks are common in Hotham Park and the area generally and we have another large example half-way up the western boundary of the garden, and another towards the north-east corner.

I ask for permission to carry out this work, if permission is required, which it may not be.

Sincerely,

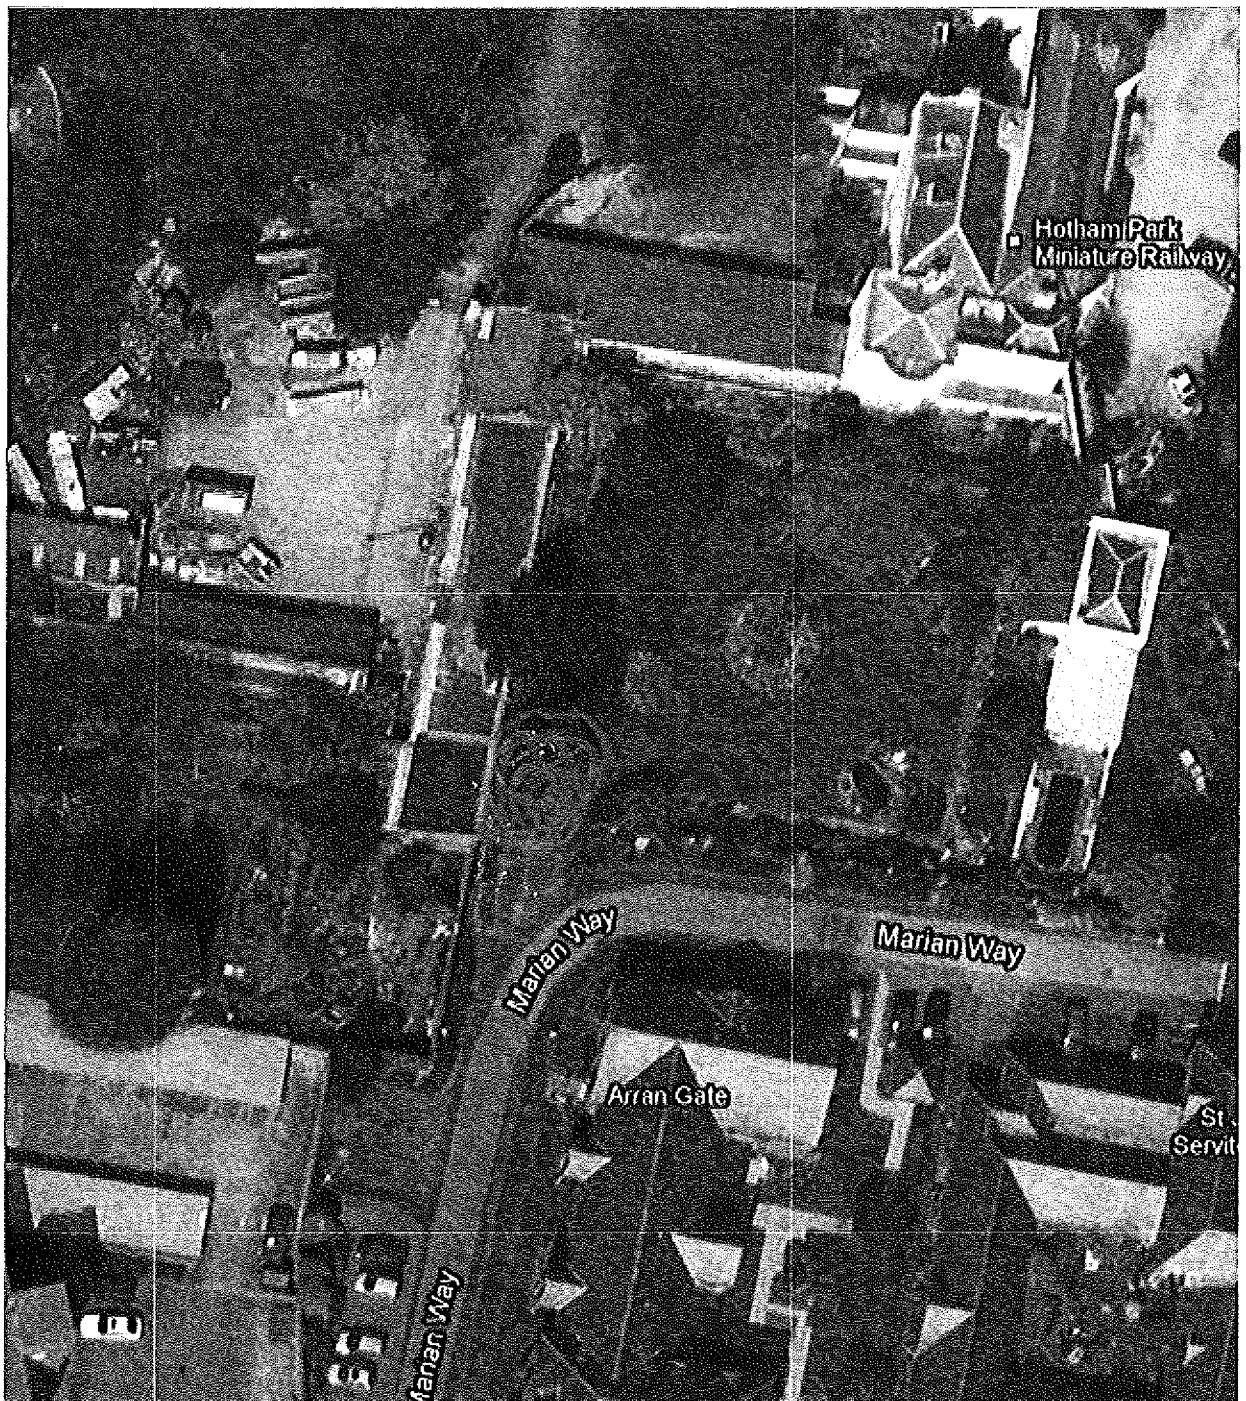

Katy Harris
