REPRESENTATIONS

Representations received:

Bognor Regis Town Council

No objection

Subject to the approval of the Arboriculturist. It is recommended that, if approved, that no work should be carried out if any birds or bats are nesting there.

1 Letter of Objection

The West Sussex Wildlife Protection Group opposes the notification on the basis that no tree surgery due to nesting birds.

Comments on Representations received:

Parish Council and Objection comments noted

Council's Arboriculturist has raised no objection to the surgery on health and safety grounds.

An informative relating to the Wildlife and Countryside Act will be placed on any decision regarding nesting of birds and bats during the months between April to September.

CONSULTATIONS

Council's Arboriculturist

Consultations responses received:

Council's Arboriculturist

I have inspected the Evergreen Oak tree with the applicant and confirm that the work is necessary to avert a health and safety risk where it is evident that dead wood and basal bark disease is apparent.

Conservation Area Advisory Committee

No objection

Comments on Consultation responses:

None.

PLANNING POLICY GUIDANCE

SUPPLEMENTARY POLICY GUIDANCE

XXX1	Circular 36/78
XXX2	DETR TPO's A guide to Law and Good Practice

POLICY COMMENTARY

The above policies are general and, other than Circular 36/78 and DETR TPOs, are not specific to trees.

DEVELOPMENT PLAN AND/OR LEGISLATIVE BACKGROUND

Section 211(1) of the Town and Country Planning Act 1990 states:-

'Subject to the provision of this section and Section 212, any person who, in relation to a tree to which this section applies, does any act which might by virtue of Section 198(3)(a) be prohibited by a Tree Preservation Order shall be guilty of an offence.'

It is a defence to have provided notification to the Local Planning Authority 6 weeks in advance of any works. This is to enable the Local Planning Authority time to consider making a Tree Preservation Order.

OTHER MATERIAL CONSIDERATIONS

It is considered that there are no other material considerations to warrant a decision otherwise than in accordance with the Development Plan and/or legislative background.

CONCLUSIONS

The notification is for the proposed works to a Holm Oak tree within the Upper Bognor Road and Mead Lane Conservation Area.

The Holm Oak tree is sited within the rear garden of Hotham Park House in the north west corner and there are two other Holm Oak trees within the garden. The tree is of a significant height and spread and visible to the rear in Arran Gate and of visual amenity. The notification seeks to crown thin by 30% as there are branches that are overhanging the visitor parking spaces in Arran Gate and the residents are concerned regarding safety and damage that may be caused by falling branches.

The Council's Arboriculturist has inspected the tree and has raised no objection to the work on health and safety grounds.

It is therefore recommended that no objection be raised or Tree Preservation Order be made.

RECOMMENDATION

NO OBJECTION

- 1 **INFORMATIVE:** The applicant should note that under Part 1 of the Wildlife and Countryside Act 1981, with only a few exceptions, it is an offence for any person to intentionally take, damage or destroy the nest of any wild birds while the nest is in use or being built. Birds nest between March and September and therefore removal of dense bushes, ivy or trees or parts of trees etc. during this period could lead to an offence under the act.

- 2 **INFORMATIVE:** This notice does not give authority to destroy or damage a bat roost or disturb a bat. Bat species are protected under Section 39 of the 1994 Conservation (Natural Habitats etc) Regulations (as amended), the 1981 Wildlife and Countryside Act (as amended) and the 2000 Countryside and Rights of Way Act. It is illegal to damage or destroy any bat roost, whether occupied or not, or disturb or harm a bat. If you are aware that bats roost in a tree(s) for which work is planned, you should take further advice from Natural England (via the Bat Conservation Trust on 0845 1300228) or an ecological consultant before you start. If bats are discovered during the work, you must stop immediately and contact Natural England before continuing.
