

# Torc Series II Ground Anchor

The Torc Ground Anchor is **Sold Secure Gold in all categories**, making it the highest-rated ground anchor on the market. **It is also Police Secured-by-Design approved.** It can be fitted easily with DIY tools and uses four high-tensile anti-tamper fixings for maximum strength in a variety of situations.

The shackle is made from 20mm diameter hardened steel and forms a complete 'D'. This means that a thief would have to cut it twice in order to defeat it—that's two cuts through 20mm hardened steel, more even than the thickest chains! It folds flat, which keeps it out of your way, but makes it harder for thieves to attack. The Torc anchor is easy to use with even the largest (16mm and 19mm) chains and can be fitted to an existing concrete floor, brick or block wall or in a van/bike safe, or it can be embedded when laying fresh concrete. It is the only ground anchor offered with such a wide choice of fitting kits, helping to give the best fixing in a wide variety of different situations. It has two-stage corrosion protection with a zinc pre-treatment and tough powder coating finish so it can be used outdoors. It is British Made and supplied with easy-to-follow fitting instructions.
