Enterprise's Business

An important difference between Enterprise's services is that they specialise in renting replacement vehicles to customers whose own vehicles are being serviced or repaired. Most vehicles are delivered or collected from the customer's premises so that customers do not return vehicles after hours. Deliveries and collections are made exclusively within the operating hours of 8am to 6pm Monday to Friday, 9am to 12 Noon Saturday, closed Sunday.

No repairs or mechanical maintenance are carried out at the branches. Rental vehicles are not routinely carried by transported, but once or twice a year a batch may be delivered or collected on a 10 metre transported.

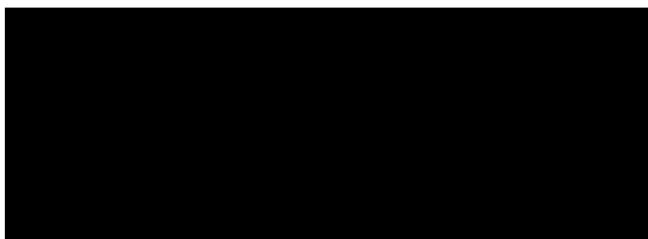

Parking

The branches are not franchised but operate under a tightly co-ordinated regional distribution system. Nationally and regionally the company deals with a large number of vehicles. This helps keep the rental fleet at exactly the optimum size. Almost all are saloon cars, the largest vehicles in the fleet are transit sized vans which there will be very few of on this particular site. Based on Enterprise's experience at over three hundred sites across the UK, no more than 10% of the rental vehicles ever need to be stored on site at any one time; the parking spaces at this branch on this site would therefore be more than enough. In the unlikely event that more rental vehicles did have to be parked, they would be spread among the other branches nearby or sent to the company's regional overflow parking facilities.

Illuminated Signs

Only a small percentage of an Enterprise sign is actually '*illuminated*' as such; the LED lights or in some cases the fluorescent tubes are only located in the areas required to be lit, ie; the white letters. The back parts of the sign are entirely opaque. The green parts of the sign emit a very dim glow, so that only the white lettering and the 'swoosh' are actually lit up. This also applies to all monument signs however, the white base on these is entirely opaque.

Yours faithfully
