Subject: RE: BR/18/19/PL - South Bersted Primary School

Dear Charlotte,

Please find attached response from MUGA pitch Suppliers Fawns. The new fencing will have rubber inserts inside the clamp bar fixings, thus preventing any potential for rattling between its parts. The fencing itself is a metal mesh that has a minimum amount of drag, allowing the wind to pass through easily.

I hope this helps,

Jonathan

Subject: BR/18/19/PL - South Bersted Primary School

Dear Mr Ng,

Thank you for arranging the photographs of the schools boundary treatments.

As part of considering this application we have consulted Environmental Health with regard to the noise impact. We have received this response:

In order for Environmental Health to provide a formal reply, please may the applicant/agent confirm what consideration has been given to the increased noise from the MUGA (specifically, the potential for rattling of the new fencing) and whether the area will be used outside of school hours and/or term time.

If you could please provide your comments by March 1st 2019 and I will then be able to request a formal response from the Environmental Health team.

Many thanks

Charlotte

Subject: rubber fixings for muga

Hi Jonathon

With reference to your question regarding excessive noise from the muga at South Bersted School. As standard to reduce this we use rubber inserts inside the clamp bar fixings.
If you would like to discuss further, please do not hesitate to contact me.

Kind Regards

Paul Hales
Area Sales Manager
