Dear Simon,

Environmental Health has no objections to this application. We would request that the following conditions are placed on any permission given:

Contaminated Land

1. Site Characterisation - An investigation and risk assessment, in addition to any assessment provided with the planning application, must be completed in accordance with a scheme to assess the nature and extent of any contamination on the site in particular asbestos, whether or not it originates within the site. The contents of the scheme are subject to the approval in writing of the Local Planning Authority. The investigation and risk assessment must be undertaken by competent persons and a written report of the findings must be produced. The written report is subject to the approval in writing of the Local Planning Authority. The report of the findings must include:
 - a survey of the extent, scale and nature of contamination;
 - an assessment of the potential risks to:
 - human health
 - property (existing or proposed) including buildings, crops, livestock, pets, woodland and service lines and pipes
 - adjoining land
 - groundwaters and surface waters
 - ecological systems
 - archaeological sites and ancient monuments
 - an appraisal of remedial options, and proposal of the preferred option(s)

This must be conducted in accordance with DEFRA and the Environment Agency's "Model Procedures for the Management of Land Contamination, CLR 11"

1. Submission of Remediation Scheme - A detailed remediation scheme to bring the site to a condition suitable for the intended use by removing unacceptable risks to human health, buildings and other property and the natural and historical environment must be prepared, and is subject to the approval in writing of the Local

Planning Authority. The scheme must include all works to be undertaken, proposed remediation objectives and remediation criteria, timetable of works and site management procedures. The scheme must ensure that the site will not qualify as contaminated land under Part 2A of the Environmental protection Act 1990 in relation to the intended use of the land after remediation.

2. Implementation of Approved Remediation Scheme - The approved remediation scheme must be carried out in accordance with its terms prior to commencement of development other than that required to carry out remediation, unless otherwise agreed in writing by the Local Planning Authority. The Local Planning Authority must be given two weeks written notification of commencement of the remediation scheme works.

Following completion of measures identified in the approved remediation scheme, a verification report that demonstrates the effectiveness of the remediation carried out must be produced, and is subject to the approval in writing of the Local Planning Authority.

3. Reporting of unexpected contamination - In the event that contamination is found at any time when carrying out the approved development that was not previously identified it must be reported in writing immediately to the Local Planning Authority. An investigation and risk assessment must be undertaken in accordance with the requirements of condition 1, and where remediation is necessary a remediation scheme must be prepared in accordance with the requirements of condition 2, which is subject to the approval in writing of the Local Planning Authority.

Following completion of measures identified in the approved remediation scheme a verification report must be prepared, which is subject to the approval in writing of the Local Planning Authority in accordance with condition 3.

Construction Management Plan

4. No development shall take place, including any works of demolition, until a Construction Environmental Management Plan has been submitted to, and approved in writing by, the Local Planning Authority. The approved Plan shall be adhered to throughout the construction period. The Plan shall provide for:
 - a. An indicative programme for carrying out of the works
 - b. The arrangements for public consultation and liaison during the construction works
 - c. Measures to minimise the noise (including vibration) generated by the construction process to include hours of work, proposed method of piling for foundations, the careful selection of plant and machinery and use of noise mitigation barrier(s)
 - d. Details of any floodlighting, including location, height, type and direction of light sources and intensity of illumination
 - e. the parking of vehicles of site operatives and visitors
 - f. loading and unloading of plant and materials
 - g. storage of plant and materials used in constructing the development
 - h. the erection and maintenance of security hoarding including decorative displays and facilities for public viewing, where appropriate
 - i. wheel washing facilities
 - j. measures to control the emission of dust and dirt during construction
 - k. a scheme for recycling/disposing of waste resulting from demolition and construction works
