Re planning for Bognor seafront

Dear Sir

Our view is being spoiled by Porteloos being installed right in front of our windows. I understand these will be removed in October, Not too soon for me.

The original underground ones could be modified, and are out of sight, which is where they should be and always have been.

They have never been a problem to the residents, if you feel they would be used for undesirables, then that's a problem you should deal with. Not leave it to the residents who pay high rates to live on the seafront.

Yours faithfully

Hazel Court
