Re Planning for Bognor sea front BR/194/17/PL

Dear Sir

Last Year, Our family helped us to move, into our lovely flat on the promenade, we have a balcony which we are able to sit out, and have our food, and enjoy all that goes on along the front, it is not so easy for us to get out, but we do have that lovely view.

We were appalled to see that a few weeks ago, portaloos popped up, we had no idea that this was going to happen, it was a great shock to us, as we did not enjoy watching people queuing, for the conveniences, not a good thing to watch, as I am sure you will agree, especially when they come out adjusting their clothes.

It would be much nicer to see more seating arrangements there, we might even then be able to wander over there to sit down, no chance of that at the moment, especially as the coffee cup takes up all the space in that area with their chairs and tables.

Now we hear this might be made permanent, with toilets EVEN facing us. What a thought,

Please Please Please rethink this and think of the people who pay the rates.

There are underground toilets that could be modernised and used as they have done so for many years, or there is a car park nearby, where it is quite common to have toilets.
