Hi Samantha,

Please see a corrected existing elevation plan attached, which I trust will address the error that you identified.

I have already sent the proposed elevations, and the arrangement plan as originally submitted confirms the proposed colour as being RAL7015, which is a slate grey colour. The existing and proposed delivery doors are metal.

I trust this helps. If you have any further queries please let me know.

Regards

Matt Holmes BA (Hons) MA MRTPI

Sorry, another point. The photo of the entrance doors that I took back in September (attached) does not accord with plan no SC-088-V1-GF-DR-K-0013 existing external elevations??

Please provide an accurate drawing of the front elevation as existing and proposed. The proposed drawing must include details of materials and colours to be used. The adverts have already been approved so this application solely relates to the physical changes to the building.

I hope we can get this sorted out soon.

Thank you

Sam

Good morning Matt

The substitute plans you sent through still do not give any information on the rear doors. I know you said in your email they are like-for-like but could you please confirm what the current material and colour is and proposed material and colour will be?

Thank you

Sam
